covid | design hub_first_months | feedback delay 0 | tuning period Nov 2024 to May 2025 | horizons -1 to 3 | all locations

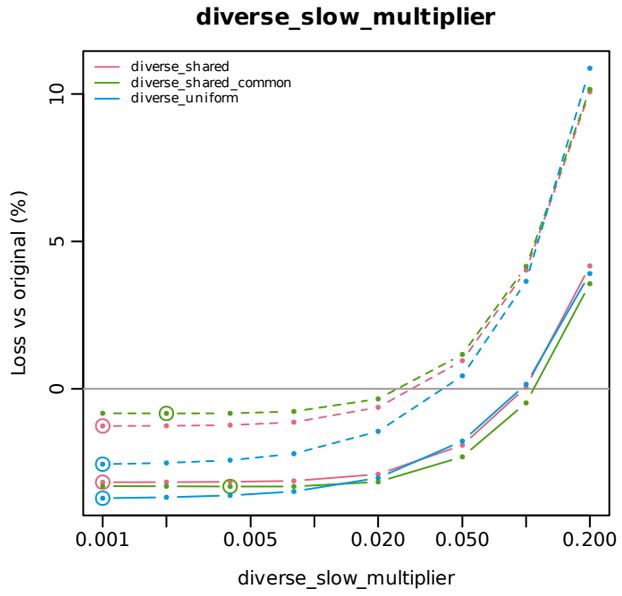

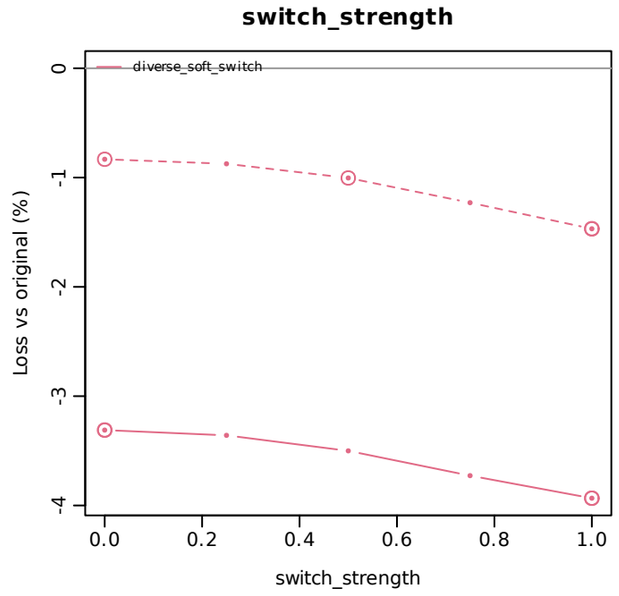

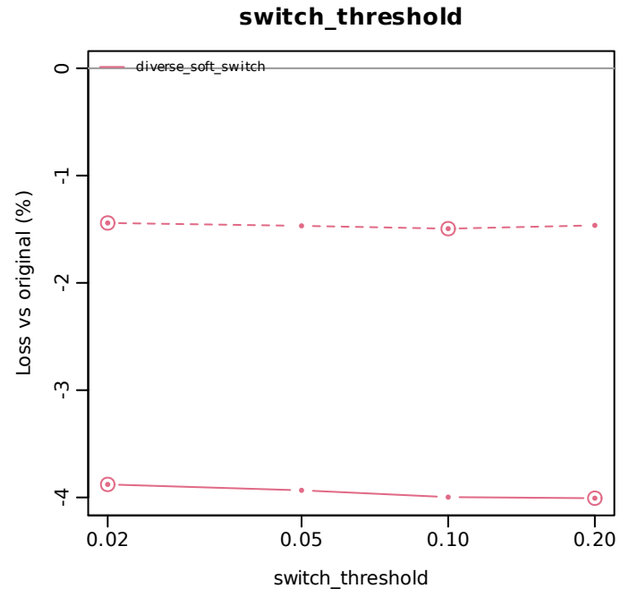

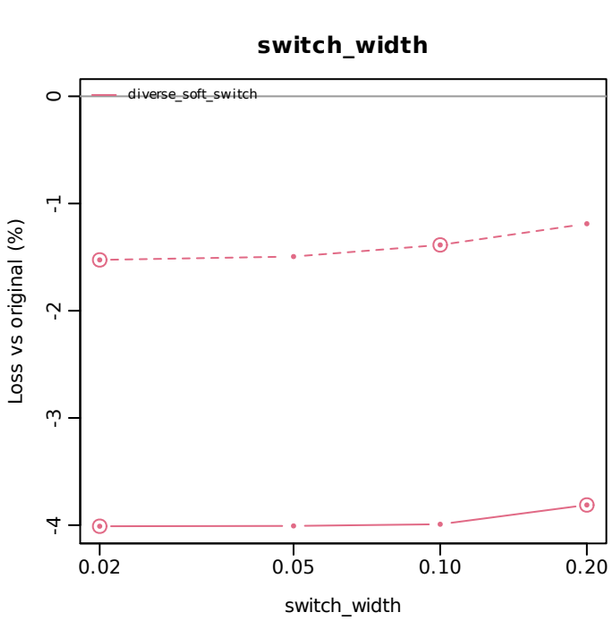

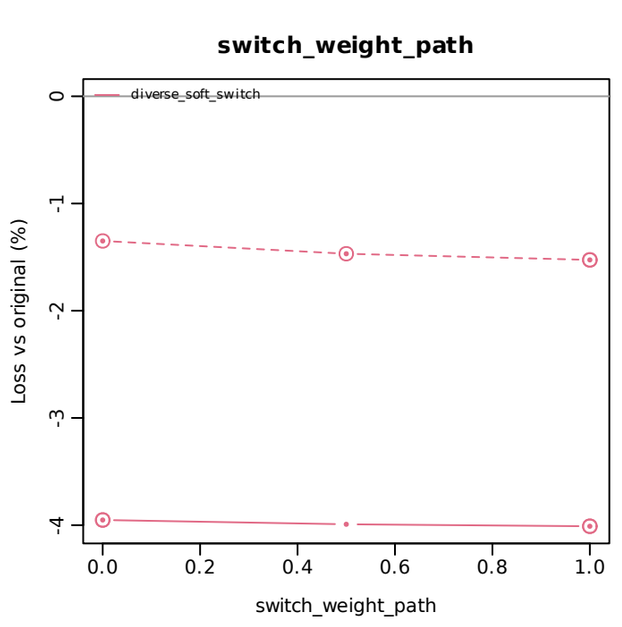

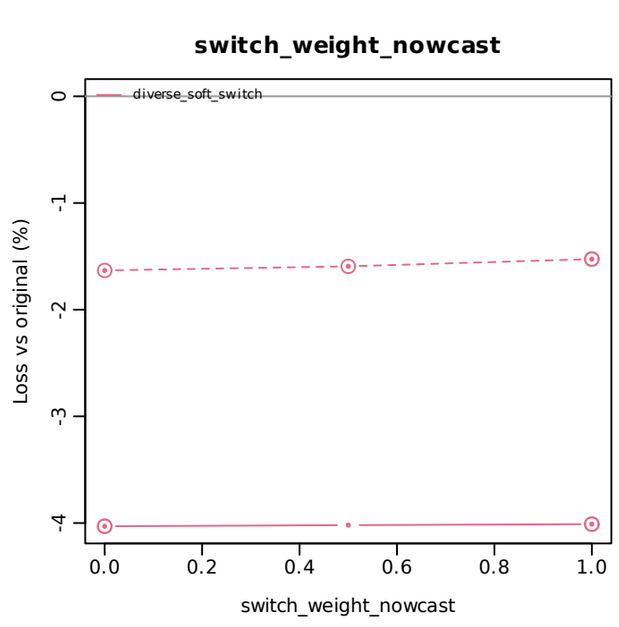

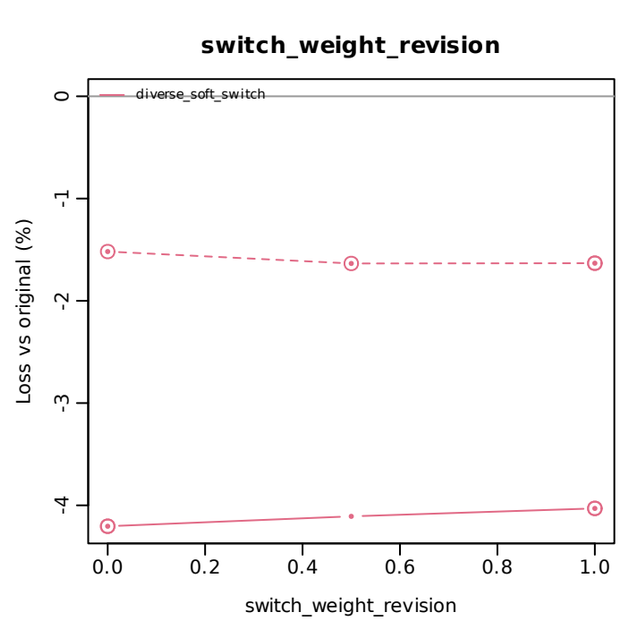

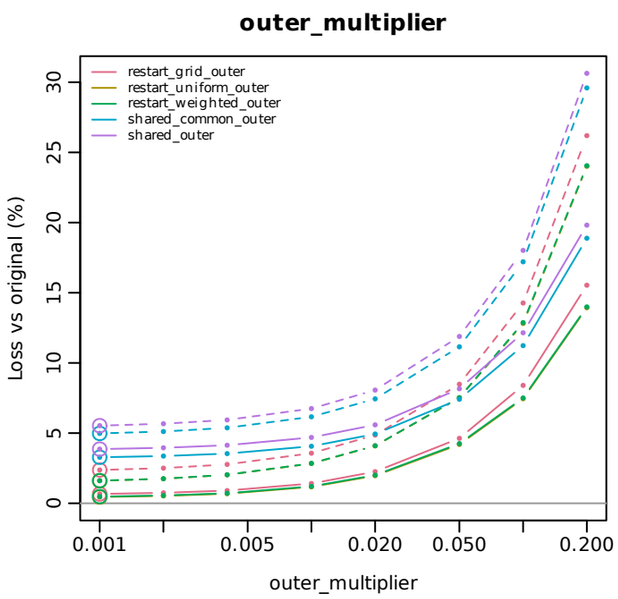

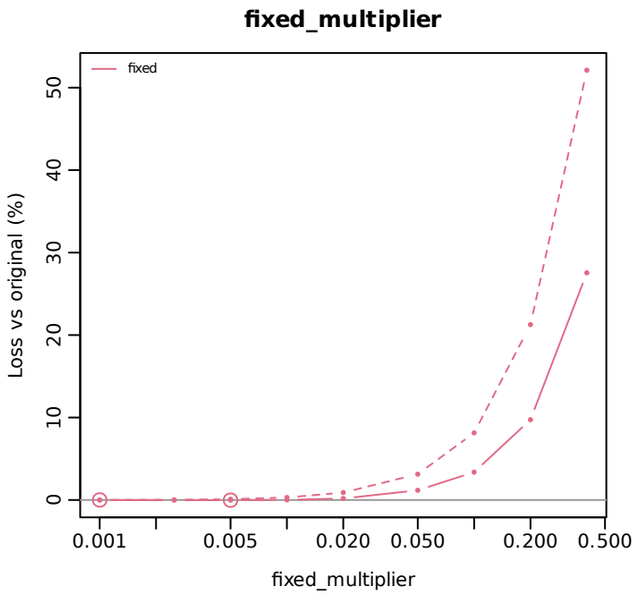

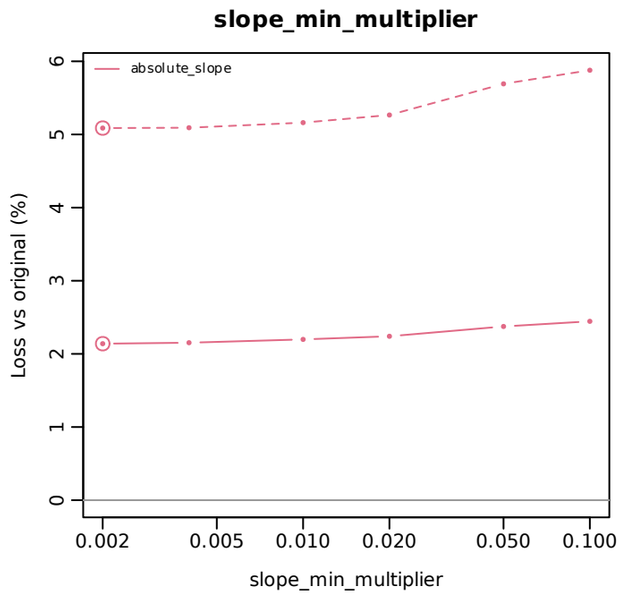

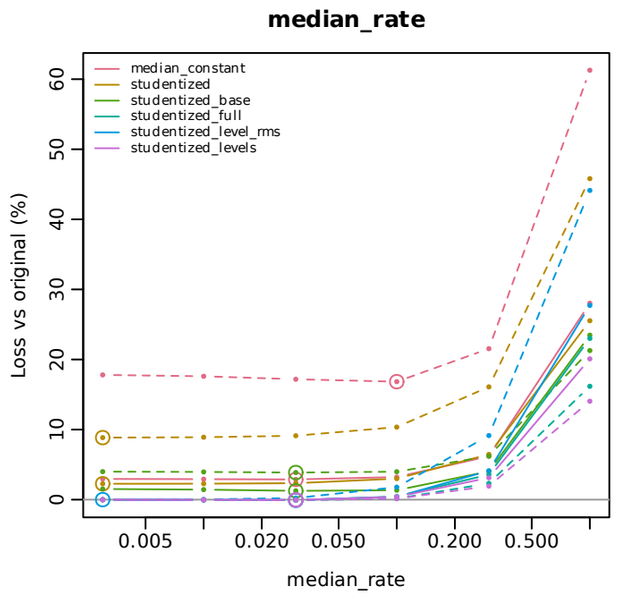

—— log1p tracker (loss of log(counts + 1)) - - - identity tracker (loss in counts per 100k residents) o chosen value

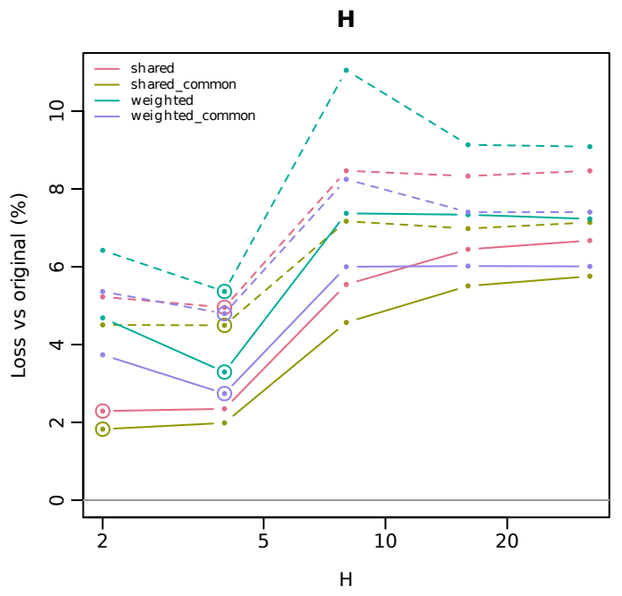

Mean pinball loss relative to the original forecasts (mean over locations and horizons), on each tracker's scale

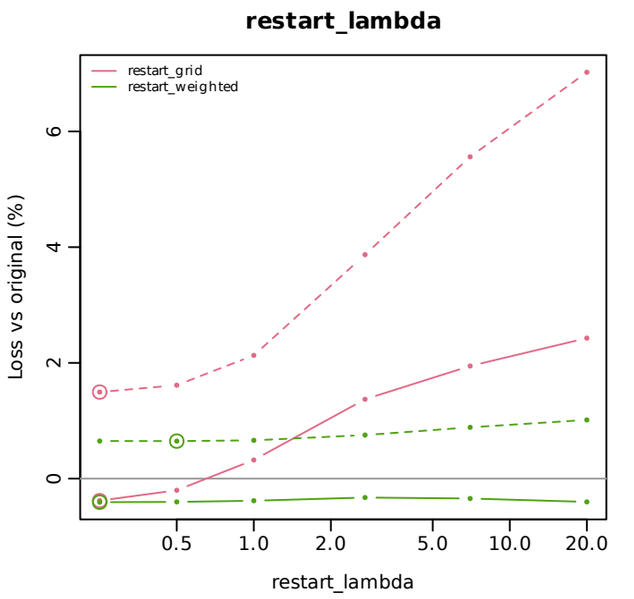

covid | design hub_first_months | feedback delay 1 | tuning period Nov 2024 to May 2025 | horizons -1 to 3 | all locations

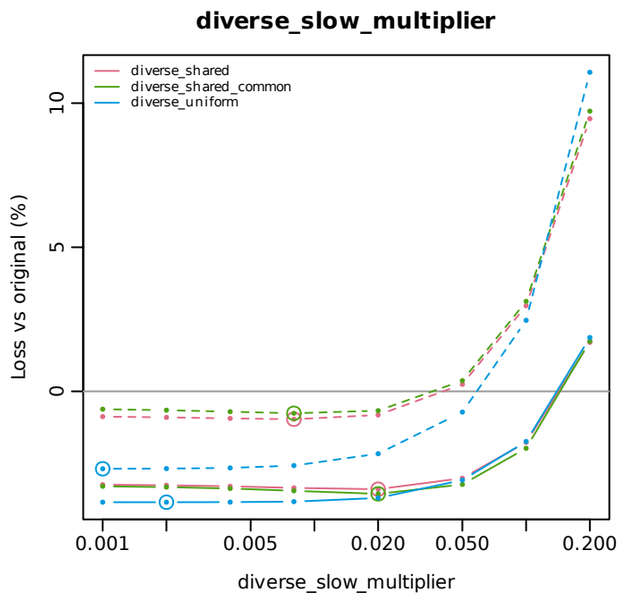

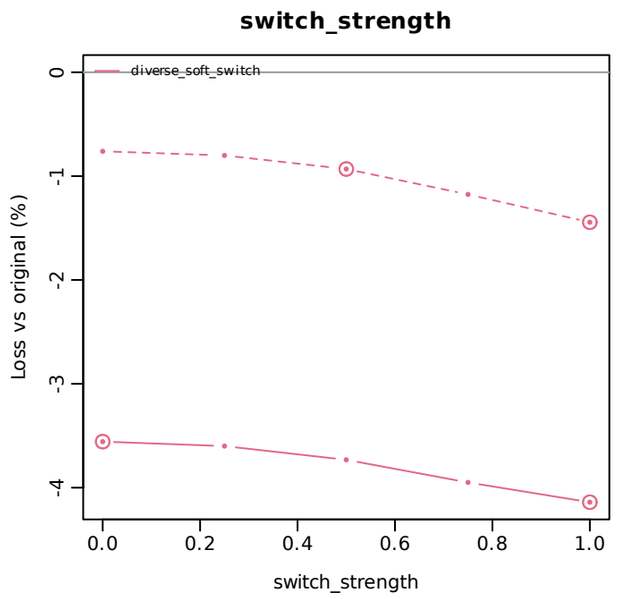

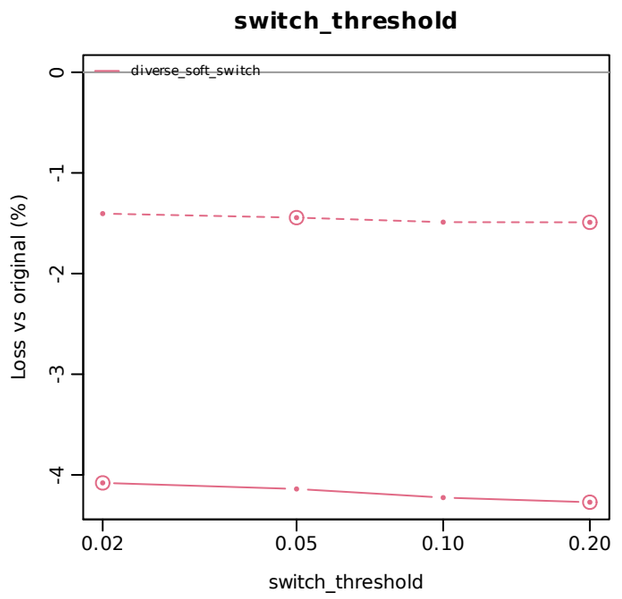

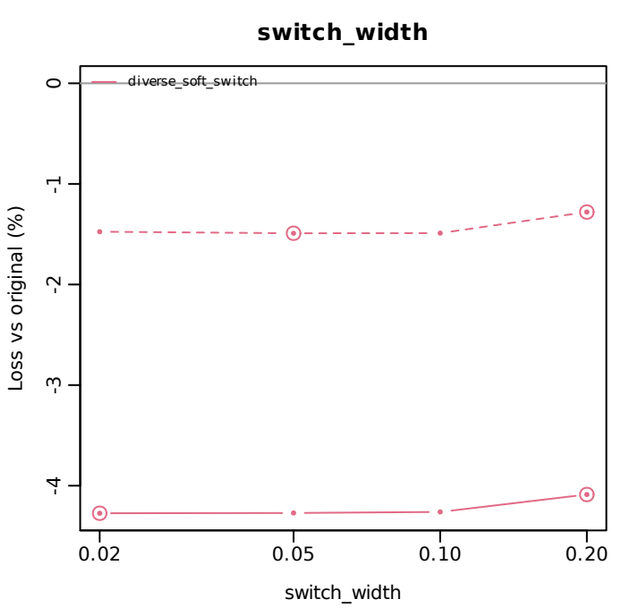

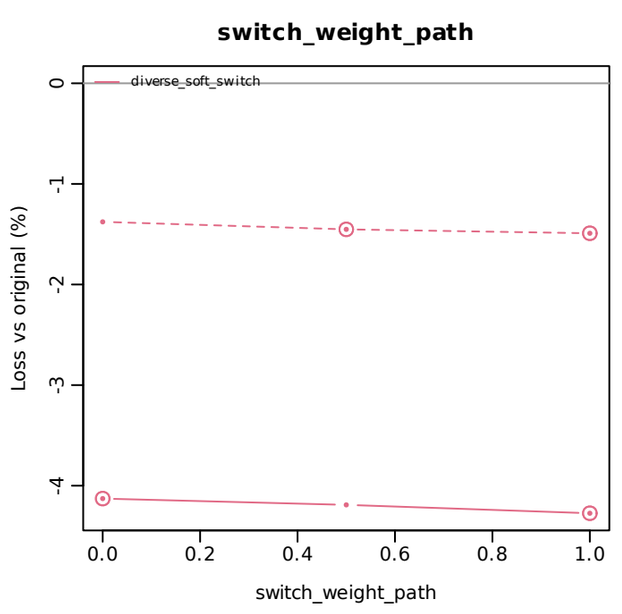

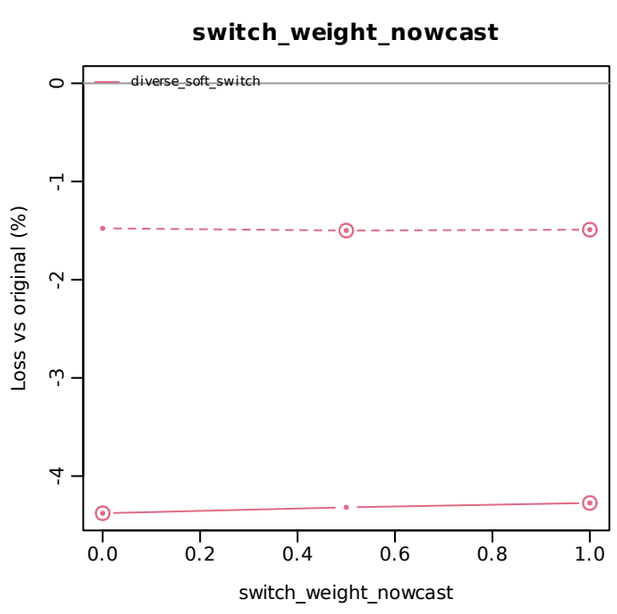

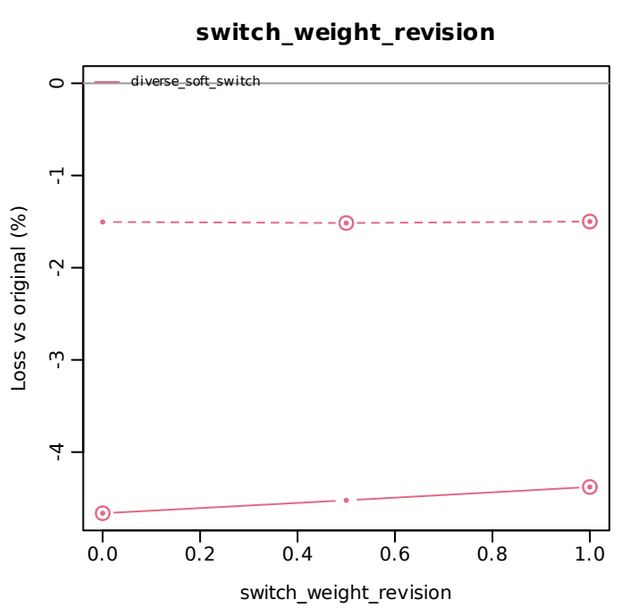

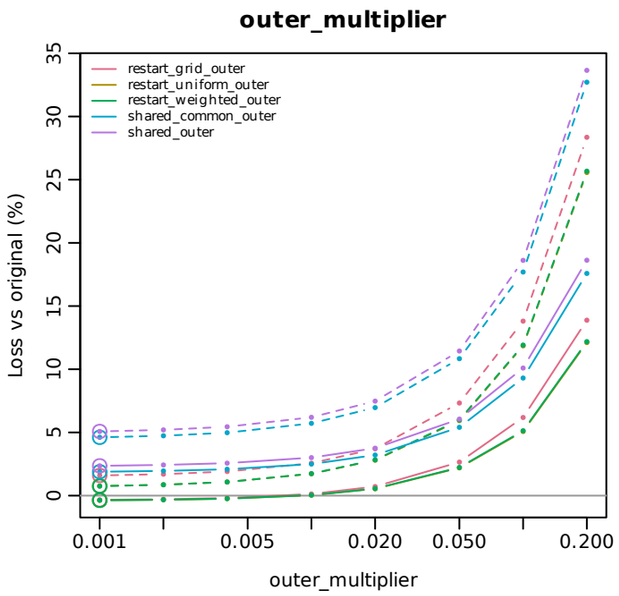

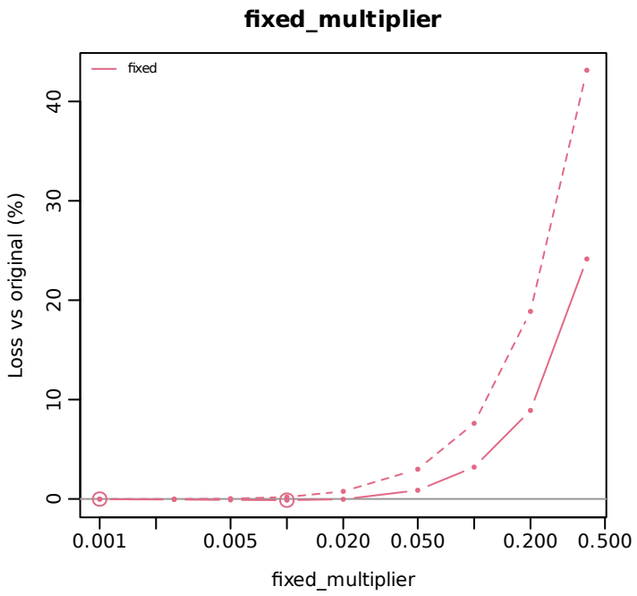

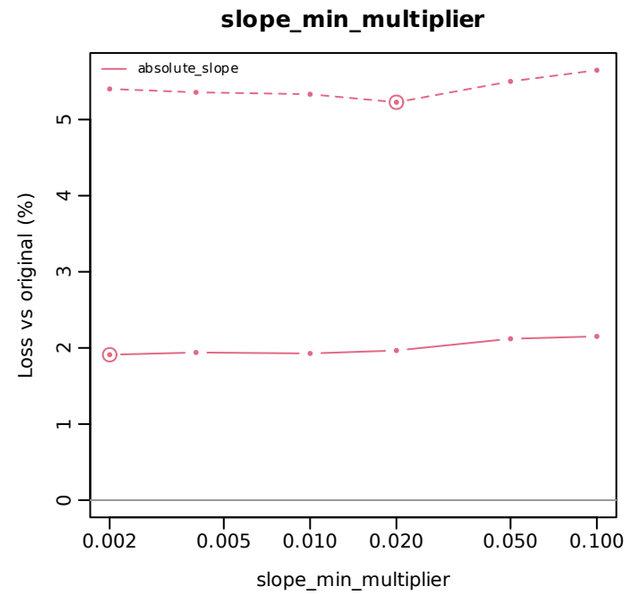

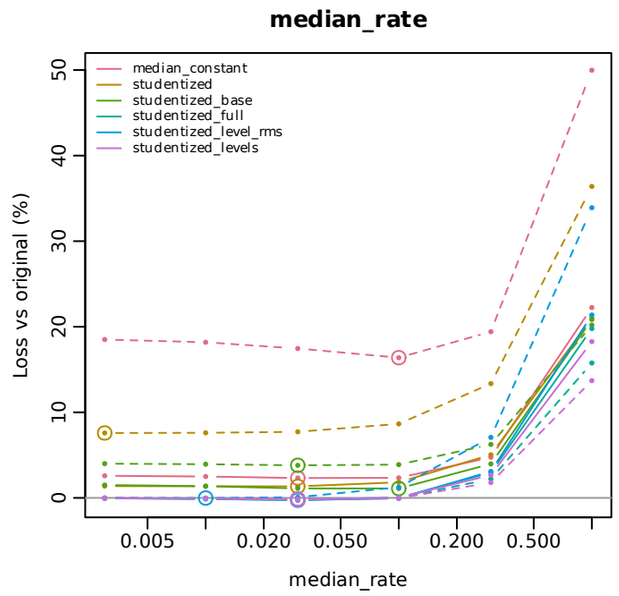

—— log1p tracker (loss of log(counts + 1)) - - - identity tracker (loss in counts per 100k residents) o chosen value

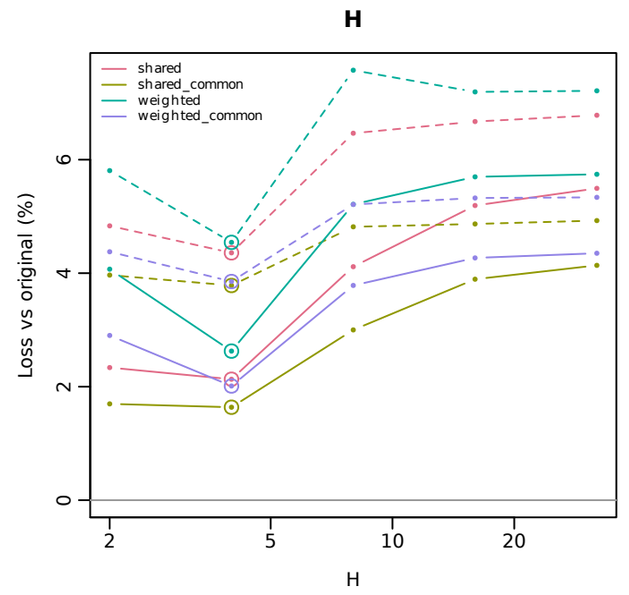

Mean pinball loss relative to the original forecasts (mean over locations and horizons), on each tracker's scale

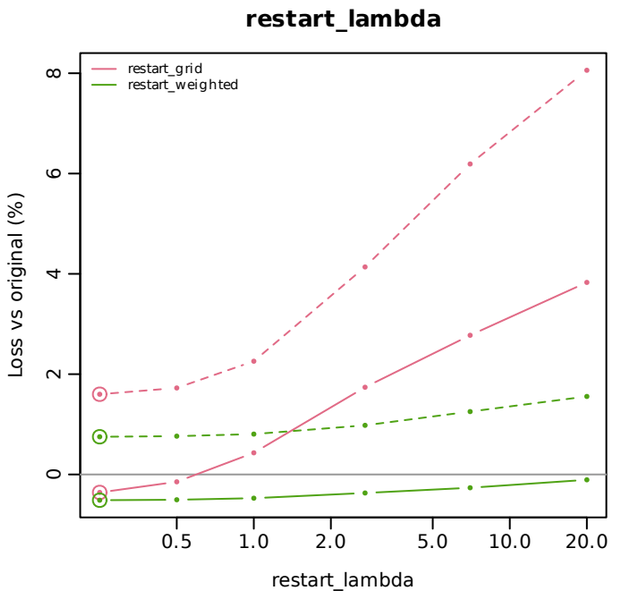

covid | design hub_first_months | feedback delay 0 + revisions (re-run) | tuning period Nov 2024 to May 2025 | horizons -1 to 3 | all locations

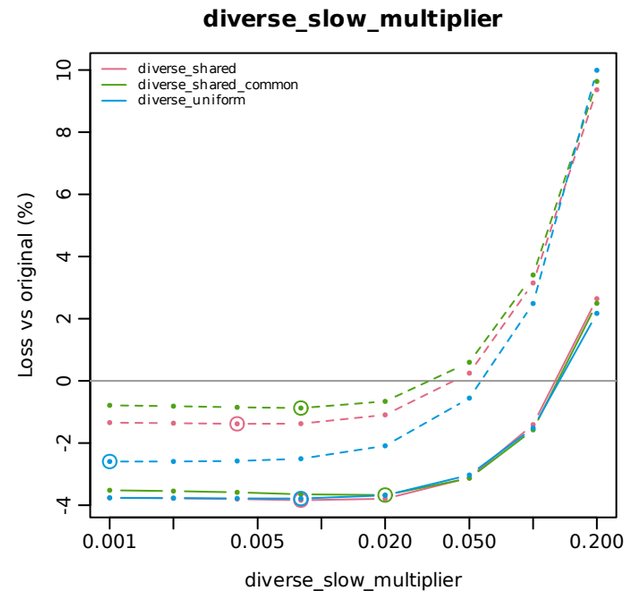

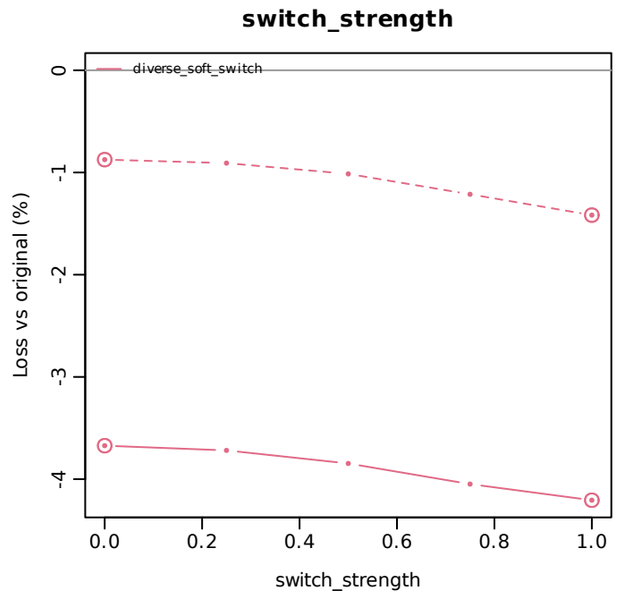

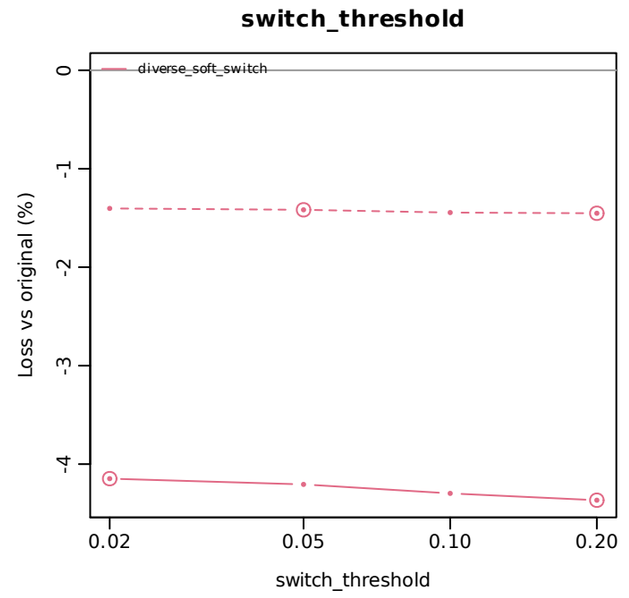

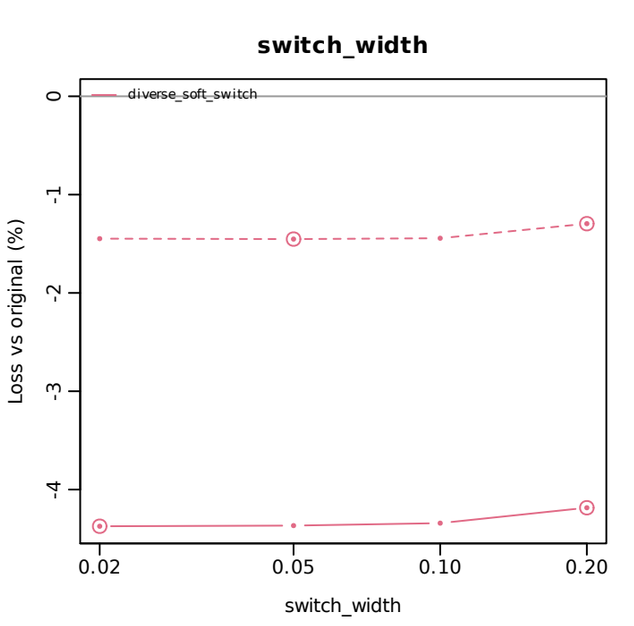

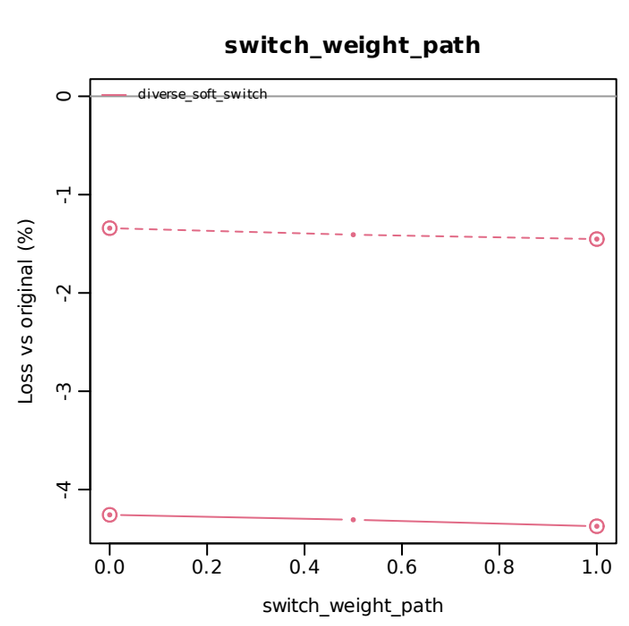

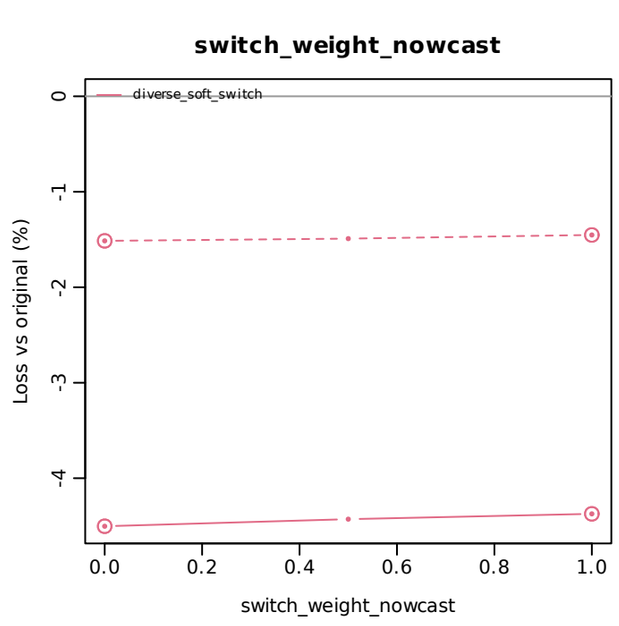

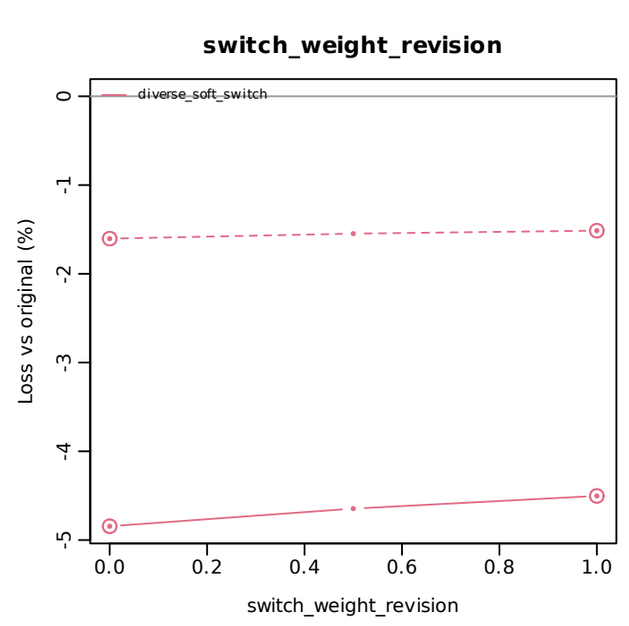

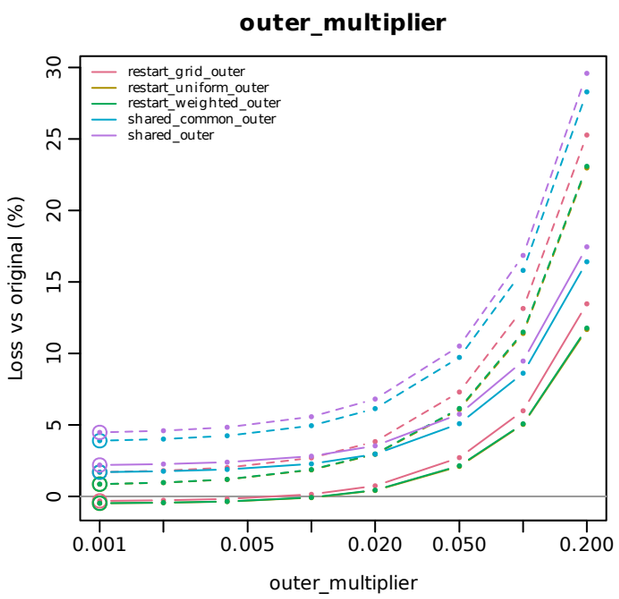

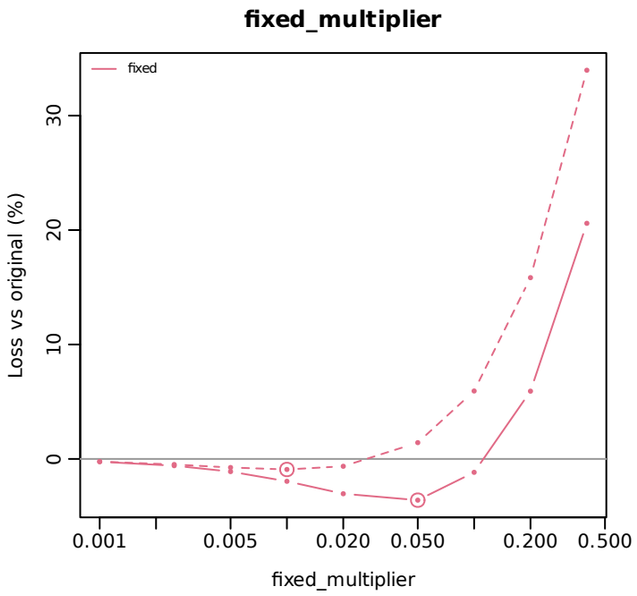

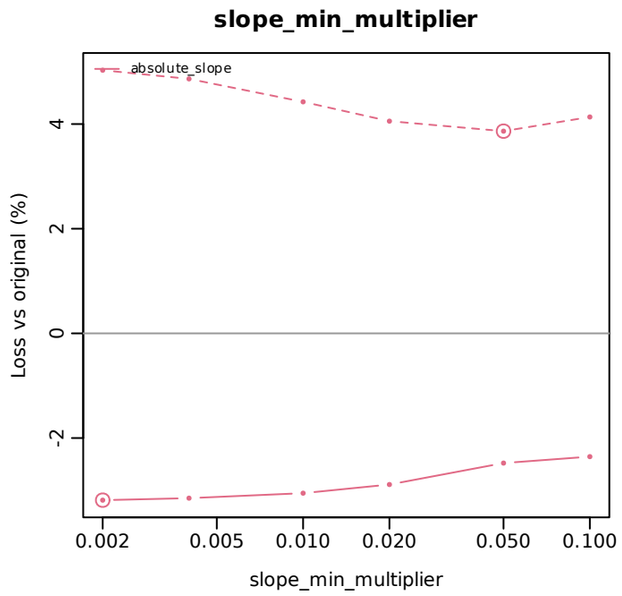

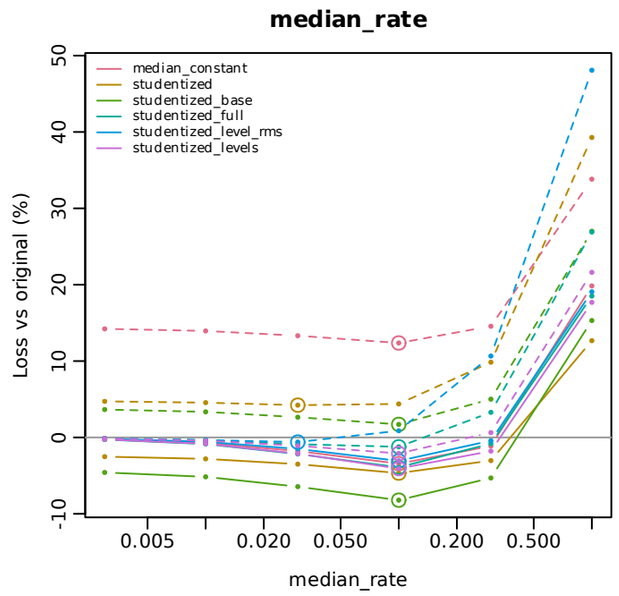

—— log1p tracker (loss of log(counts + 1)) - - - identity tracker (loss in counts per 100k residents) o chosen value

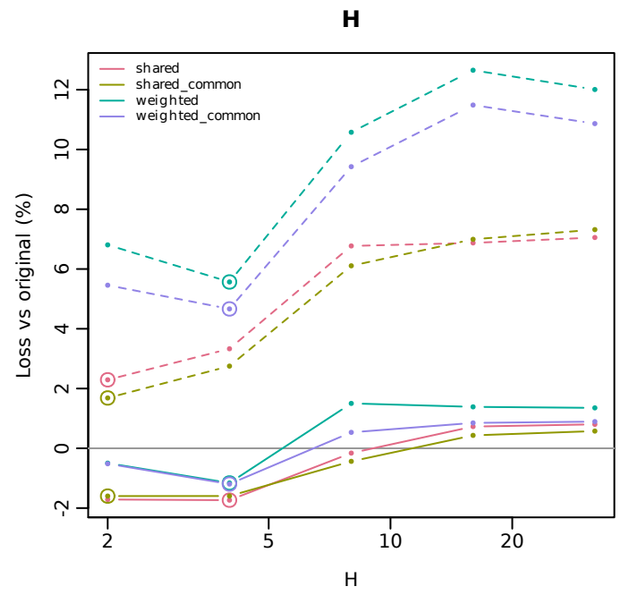

Mean pinball loss relative to the original forecasts (mean over locations and horizons), on each tracker's scale
