Frozen rate-grid weights

covid | horizon 2 | United States (US) | evaluation: Jun 2025 to the end of season 2025/26 | raw-count updates | feedback delay 0

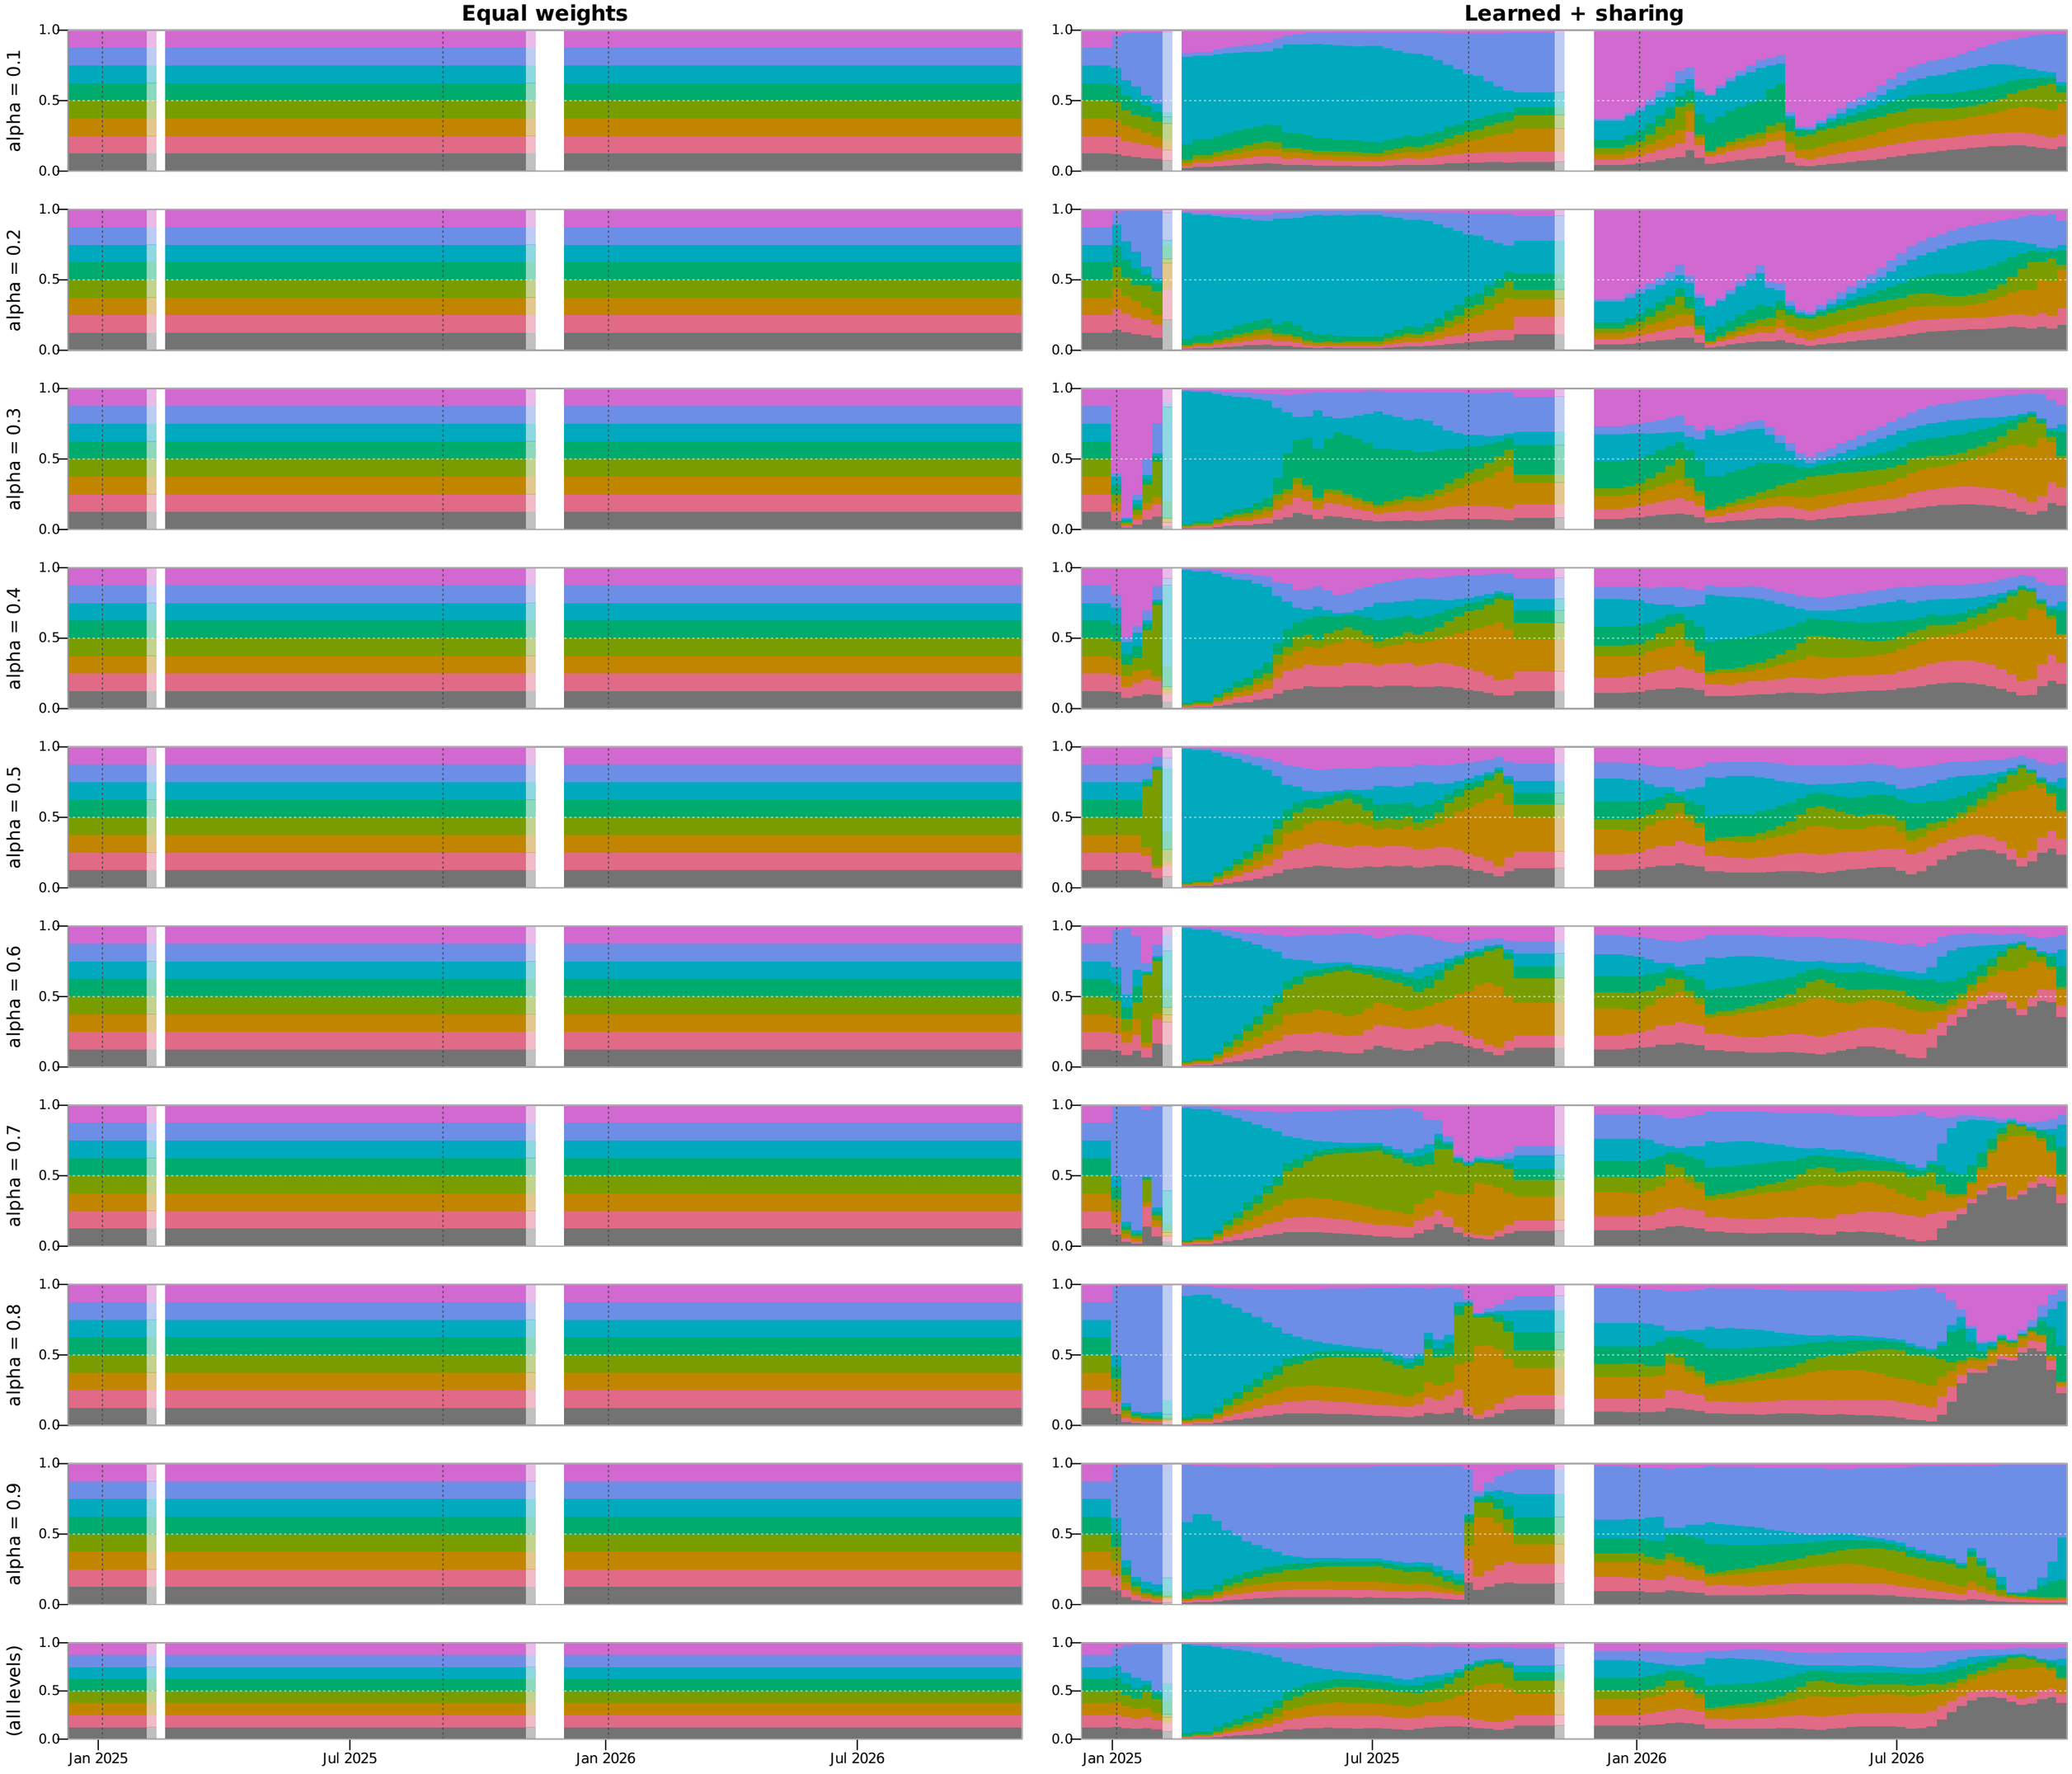

Target date | Weight at issuance for each target | Dotted lines: peaks

Rows alpha = 0.1-0.9: one weight vector per quantile level. Last row: one weight vector for all levels, learned from the mean pinball loss.

Lighter bars: rounds without a CMU forecast, filled with the latest earlier CMU forecast of the same target week.

Diverse expert weights

covid | horizon 2 | United States (US) | evaluation: Jun 2025 to the end of season 2025/26 | raw-count updates | feedback delay 0

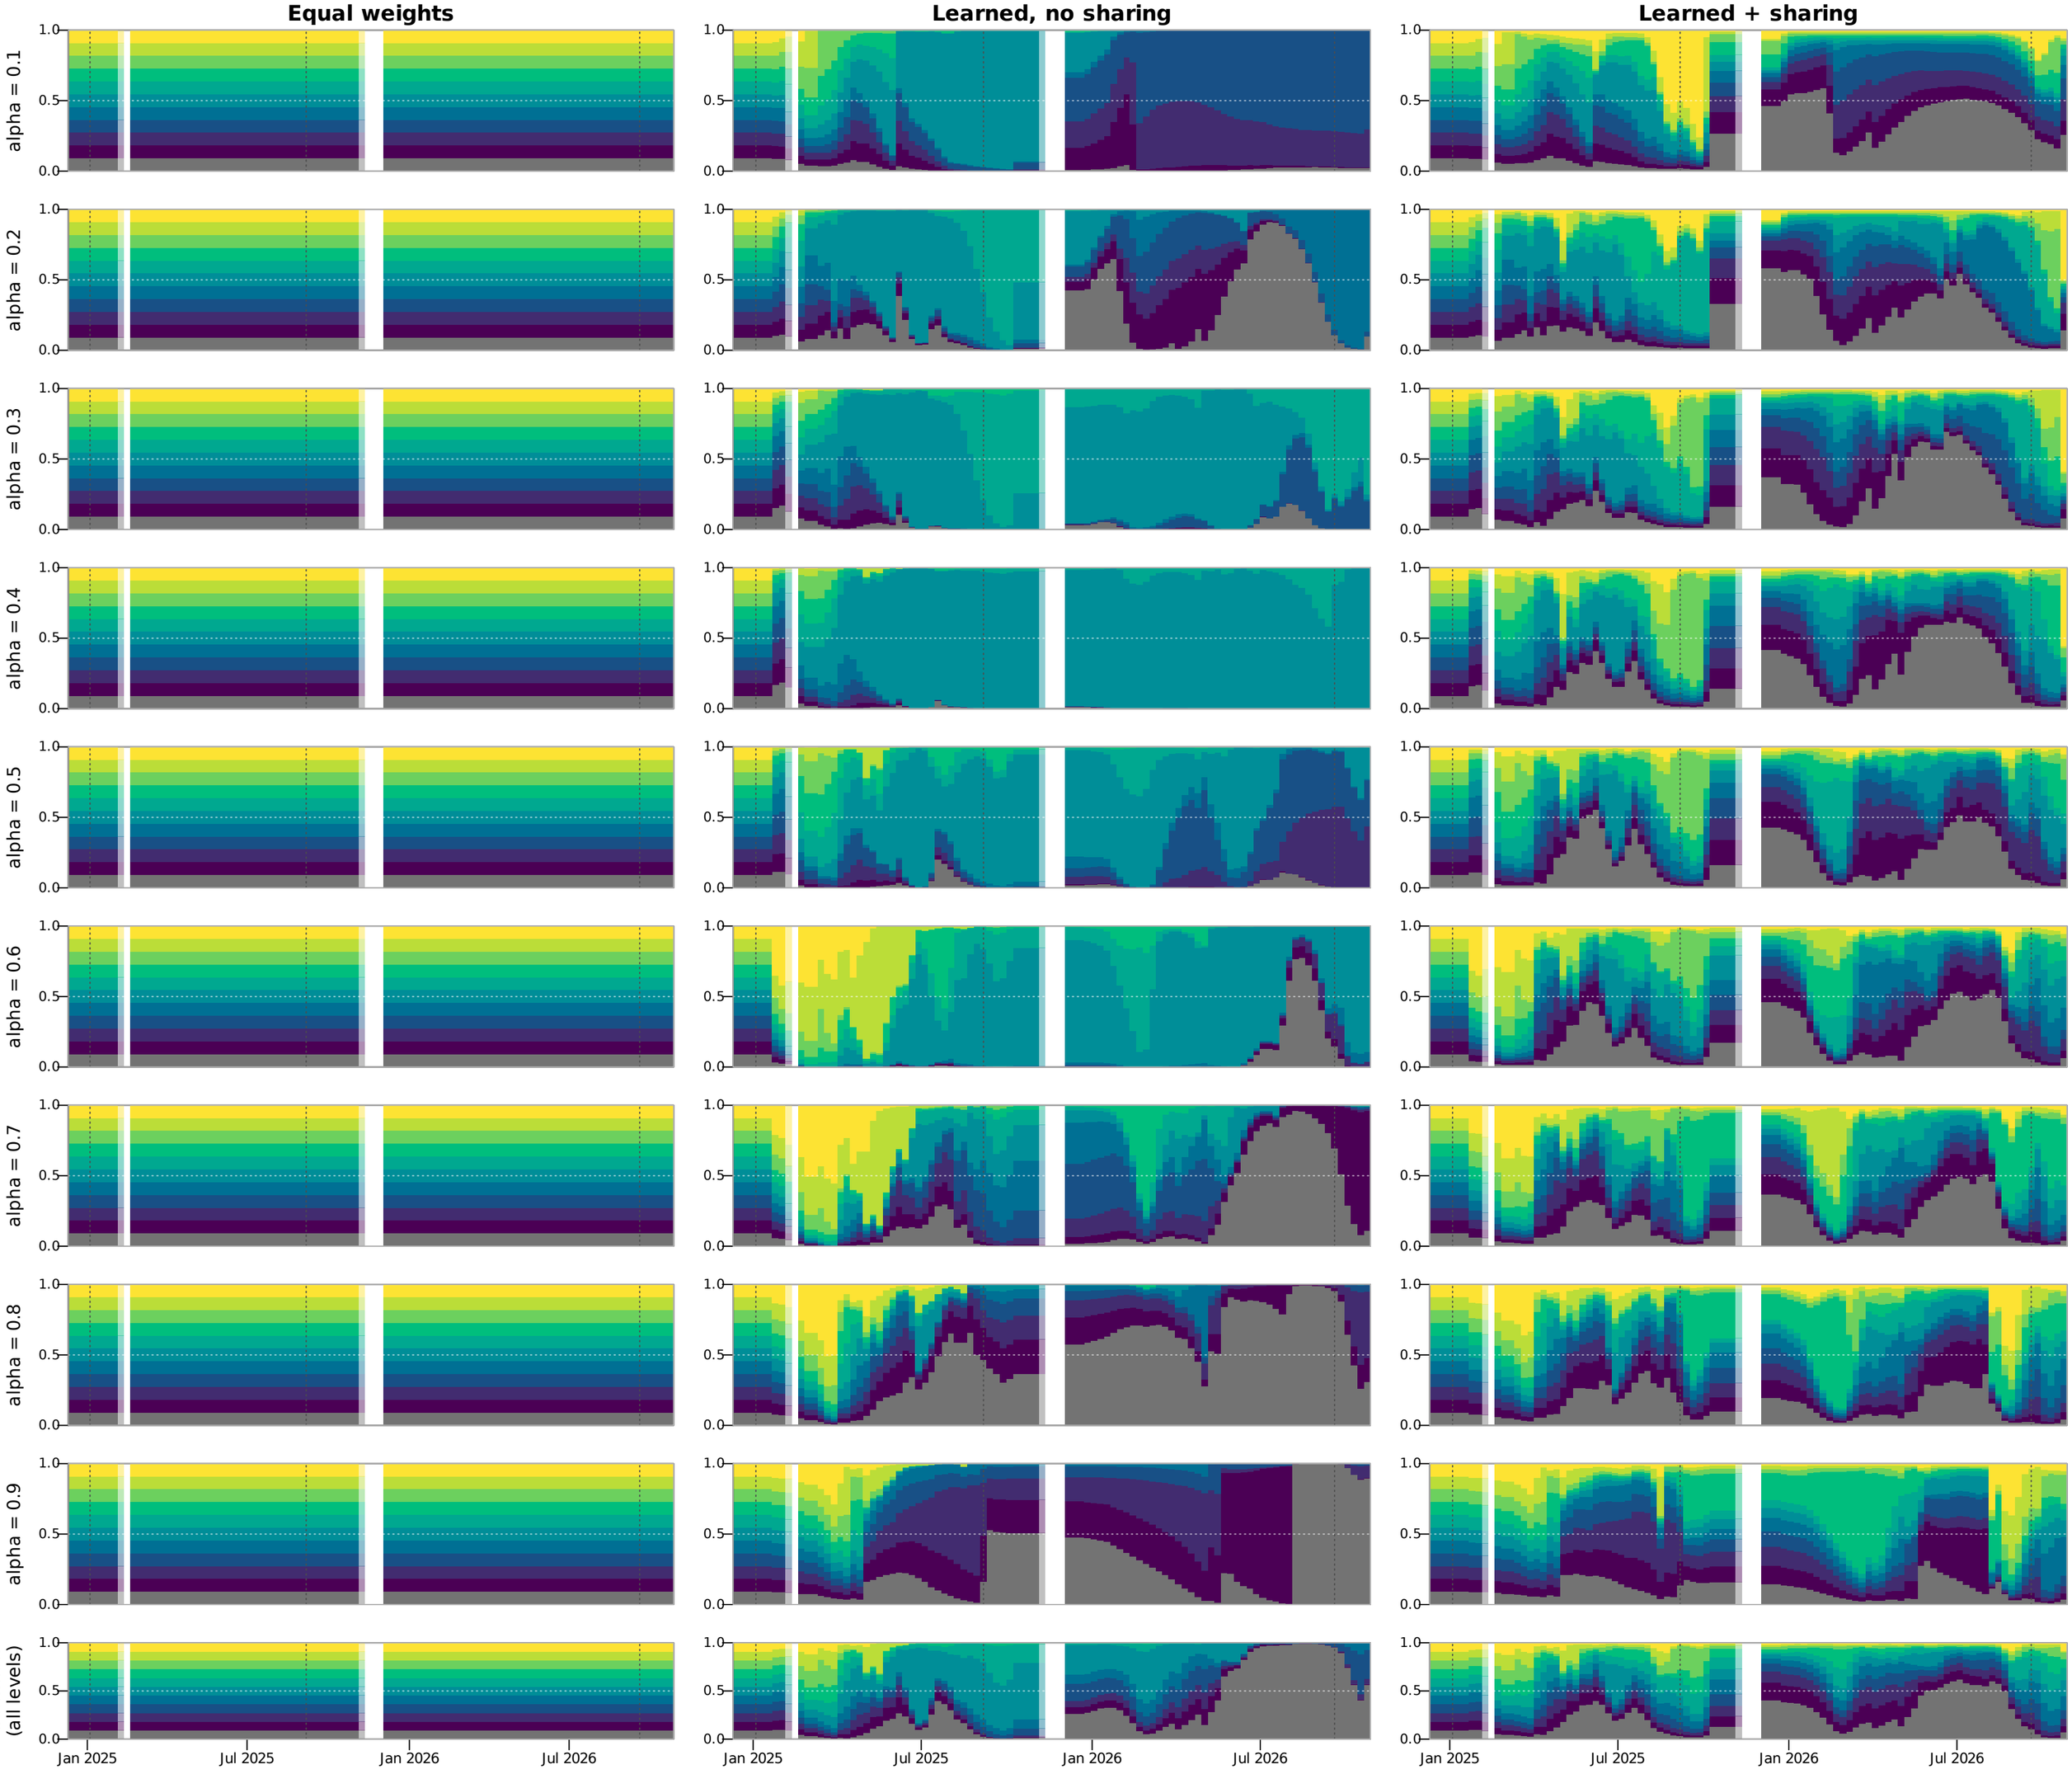

Target date | Weight at issuance for each target | Dotted lines: peaks

Rows alpha = 0.1-0.9: one weight vector per quantile level. Last row: one weight vector for all levels, learned from the mean pinball loss.
