COVID | delay 0 | Fixed-rate MultiQT: calibration error vs mean quantile loss, mean over quantile levels

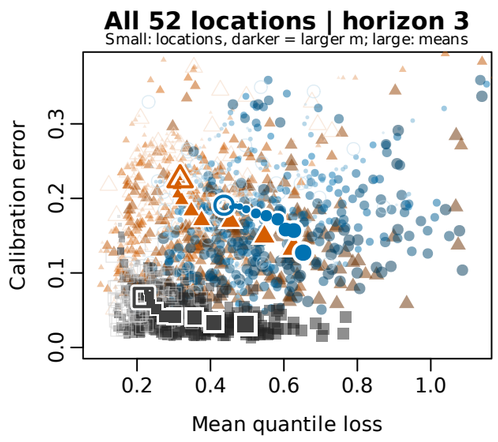

Count tracking | eta = m * S0, S0 frozen after 20 released rows (in hindsight: warmup replayed) | Feedback delay 0 | Scored against latest reported counts in counts per 100k residents | Lower left is better.

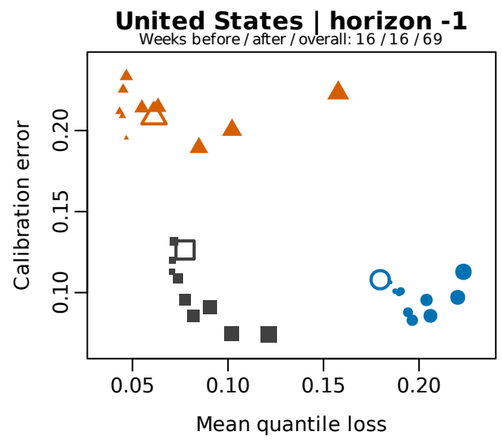

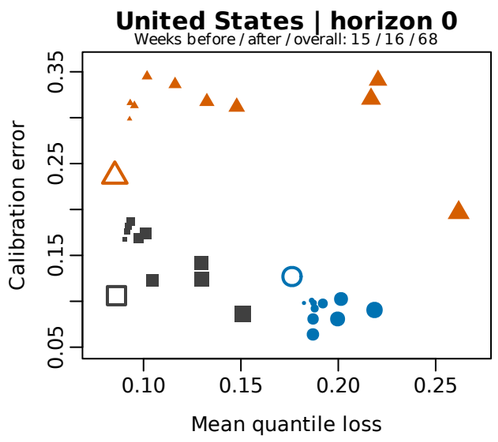

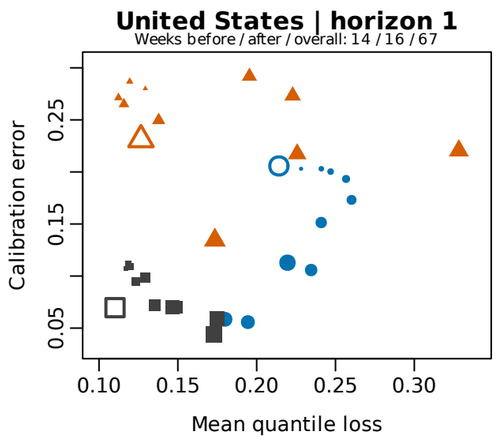

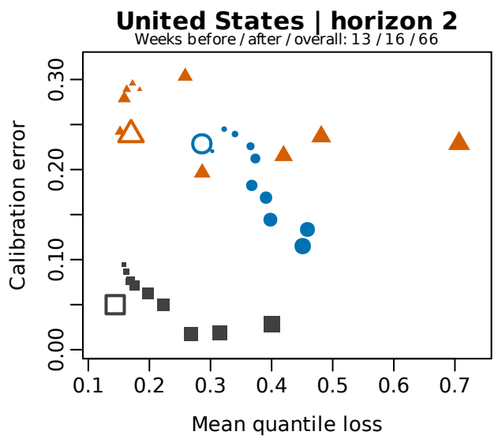

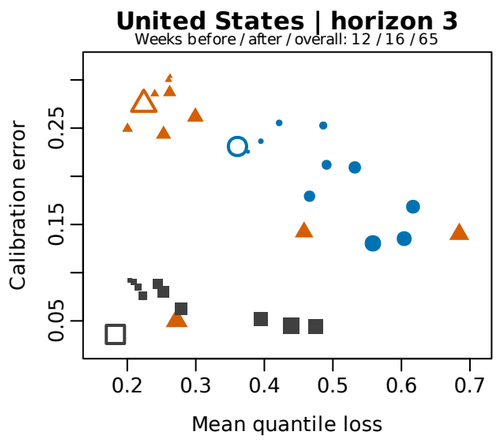

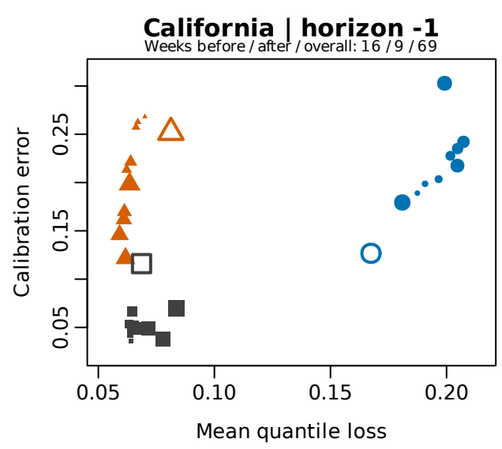

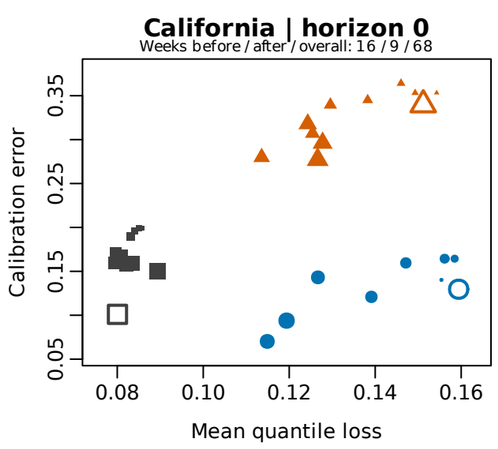

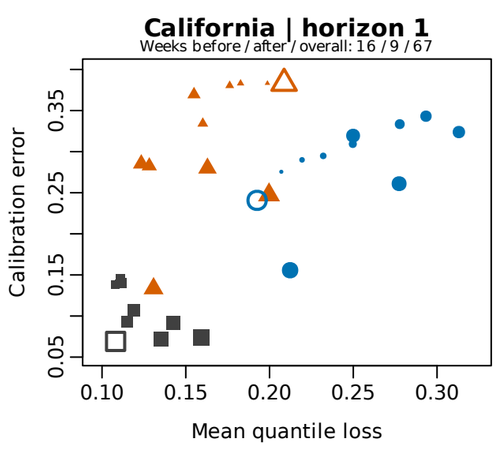

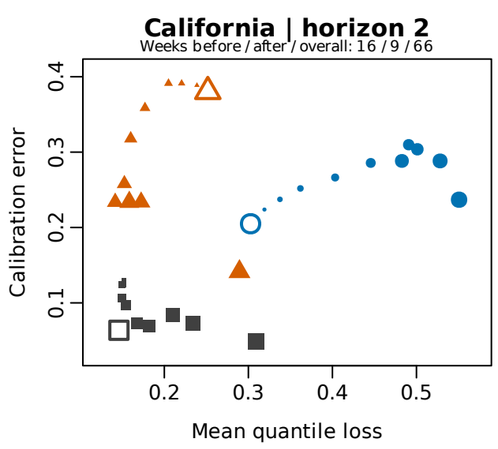

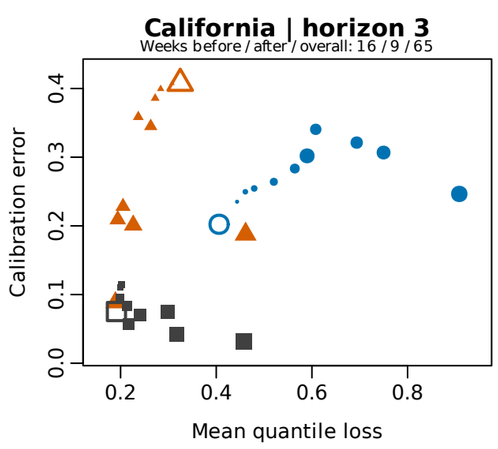

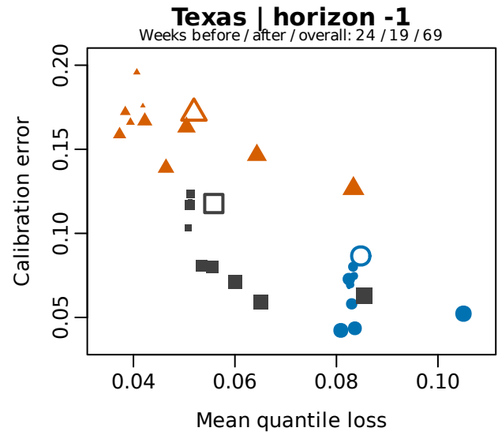

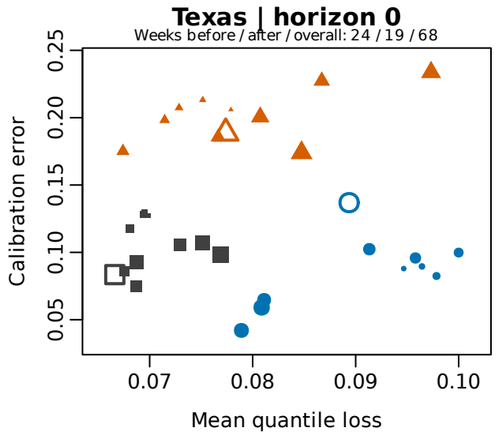

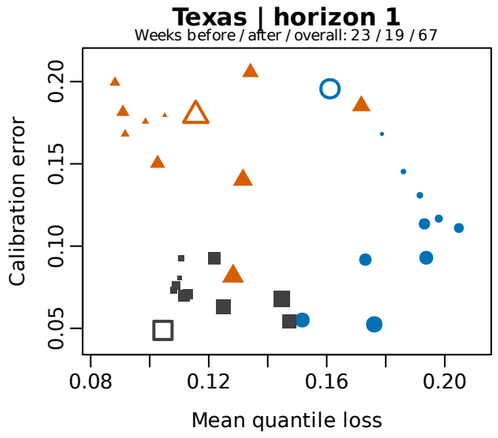

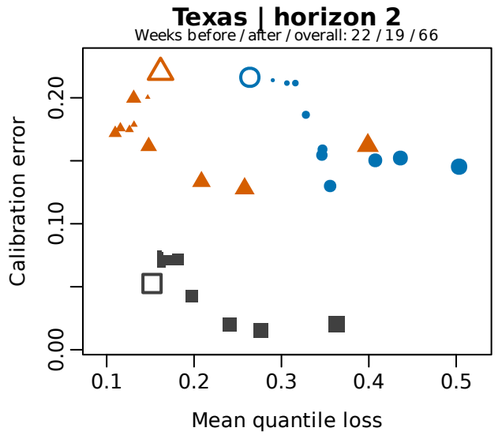

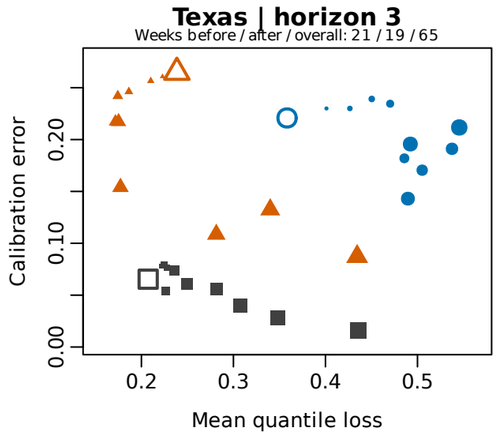

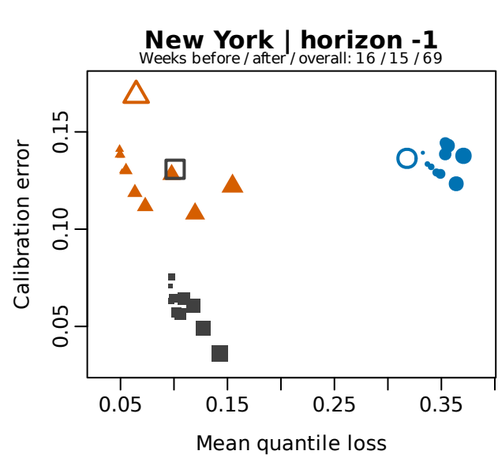

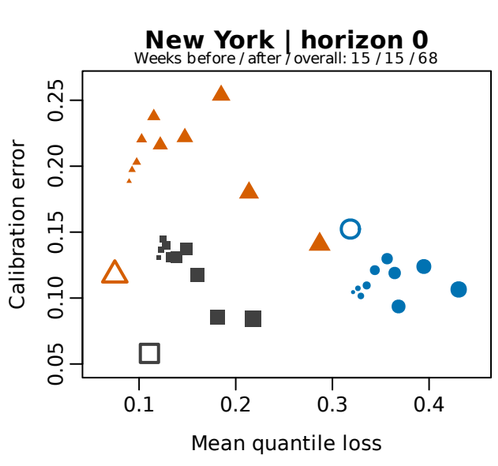

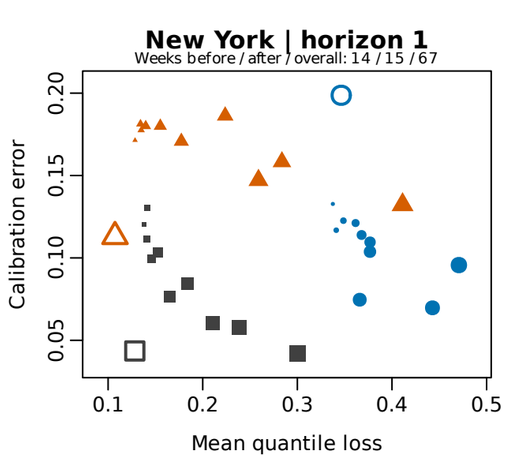

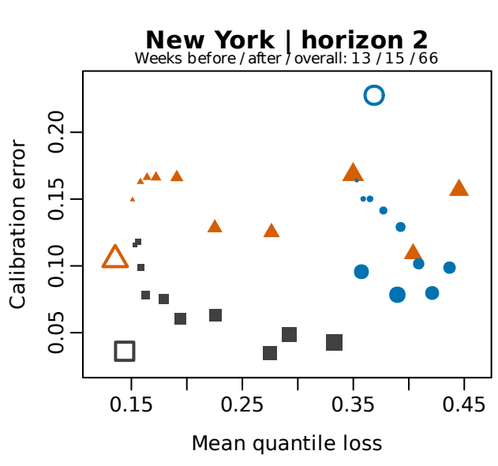

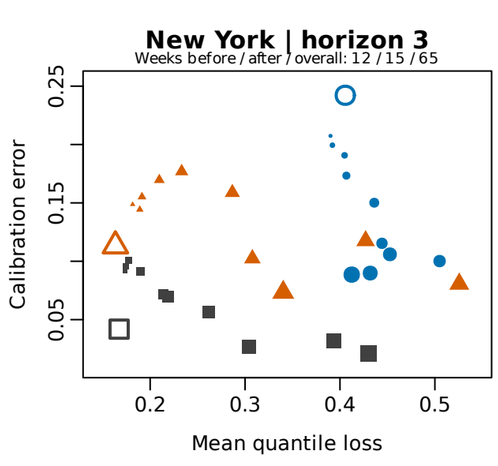

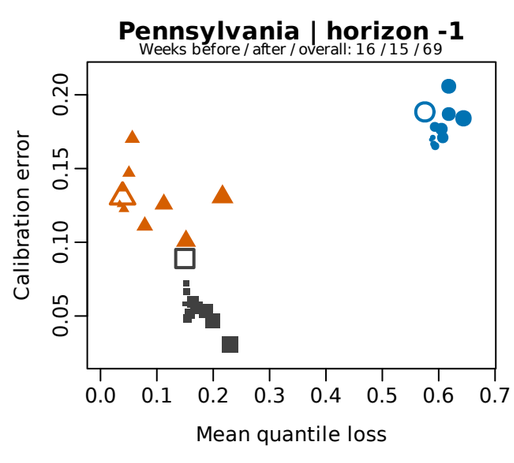

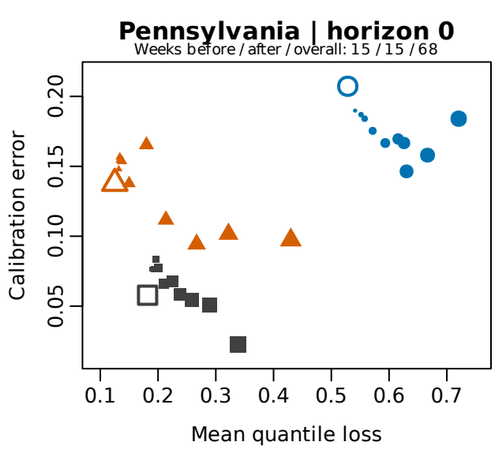

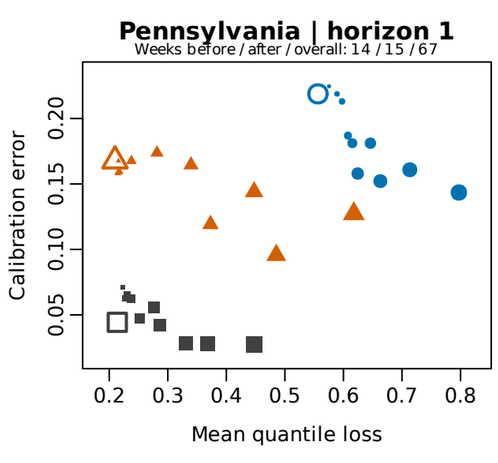

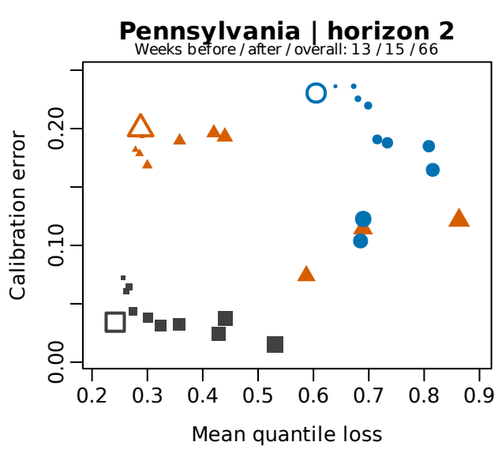

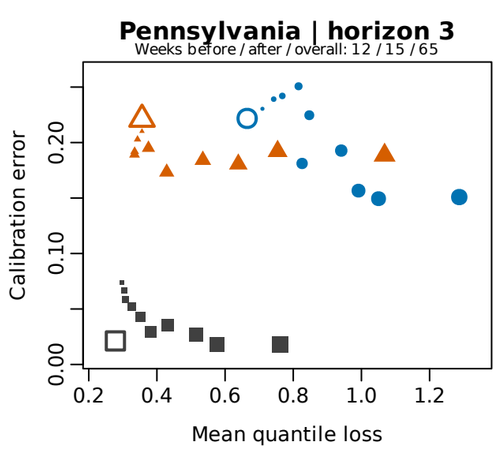

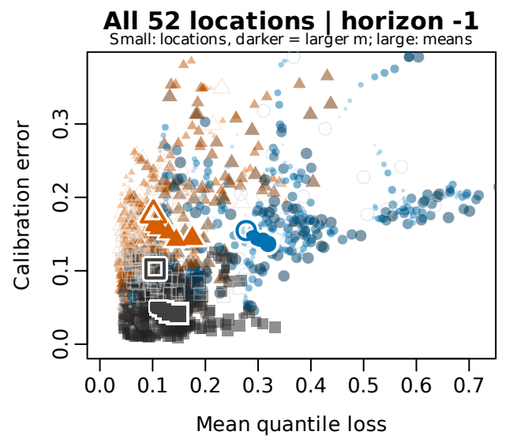

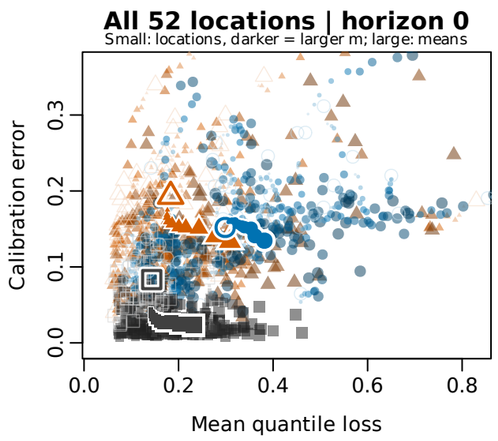

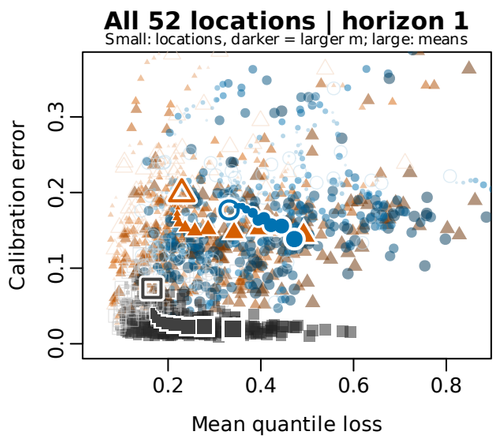

▲ Before peak (weeks -7 to 0)
● After peak (weeks 1 to 8)
■ Overall (Jun 2025 to Sep 2026)
○ Open symbol: m = 0 (original forecasts)
· m = 0.01
• m = 0.03
● m = 0.1
● m = 0.3

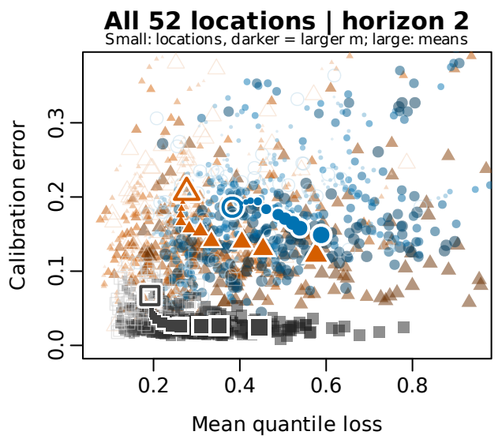

COVID | delay 1 | Fixed-rate MultiQT: calibration error vs mean quantile loss, mean over quantile levels

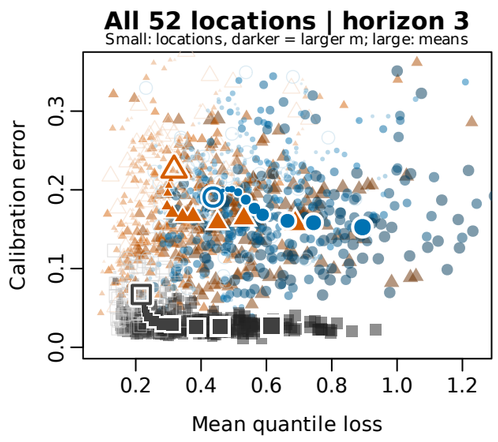

Count tracking | eta = m * S0, S0 frozen after 20 released rows (in hindsight: warmup replayed) | Feedback delay 1 | Scored against latest reported counts in counts per 100k residents | Lower left is better.

COVID | re-run | Fixed-rate MultiQT: calibration error vs mean quantile loss, mean over quantile levels

Count tracking | eta = m * S0, S0 frozen after 20 released rows (in hindsight: warmup replayed) | Feedback re-run | Scored against latest reported counts in counts per 100k residents | Lower left is better.

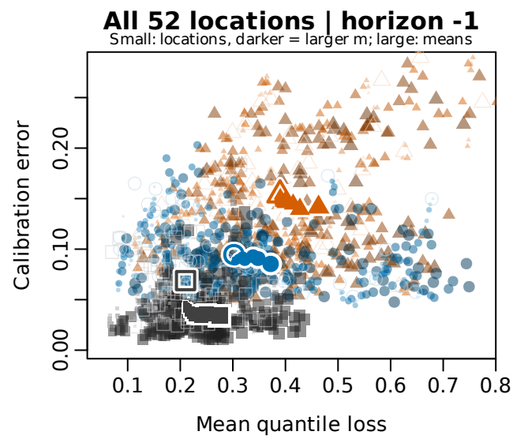

FLU | delay 0 | Fixed-rate MultiQT: calibration error vs mean quantile loss, mean over quantile levels

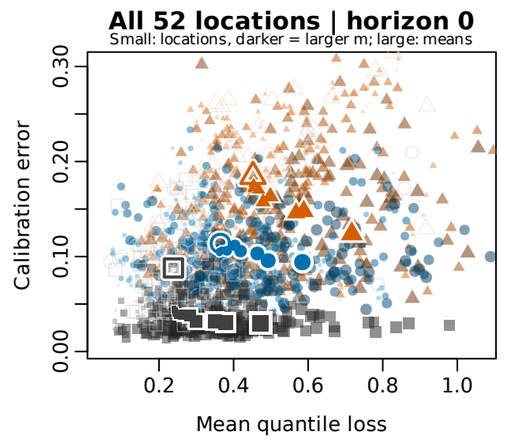

Count tracking | eta = m * S0, S0 frozen after 20 released rows (in hindsight: warmup replayed) | Feedback delay 0 | Scored against latest reported counts in counts per 100k residents | Lower left is better.

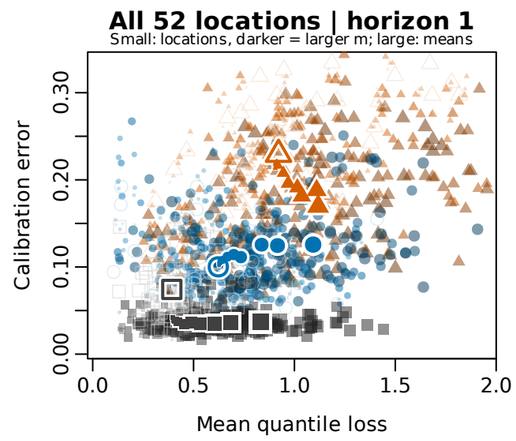

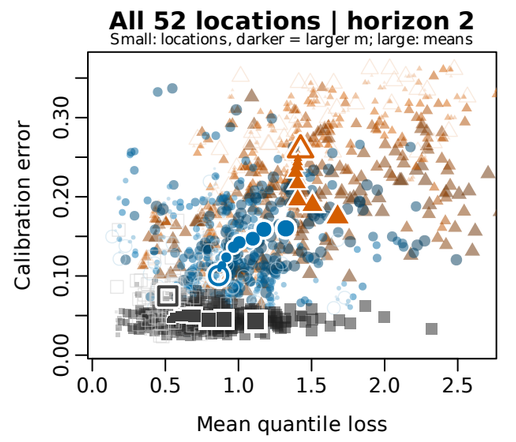

FLU | delay 1 | Fixed-rate MultiQT: calibration error vs mean quantile loss, mean over quantile levels

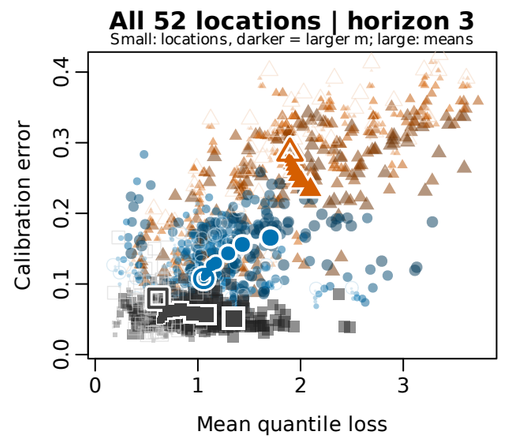

Count tracking | eta = m * S0, S0 frozen after 20 released rows (in hindsight: warmup replayed) | Feedback delay 1 | Scored against latest reported counts in counts per 100k residents | Lower left is better.
