Frozen rate-grid weights

covid | horizon 2 | United States (US) | full history | raw-count updates | feedback delay 2 week(s)

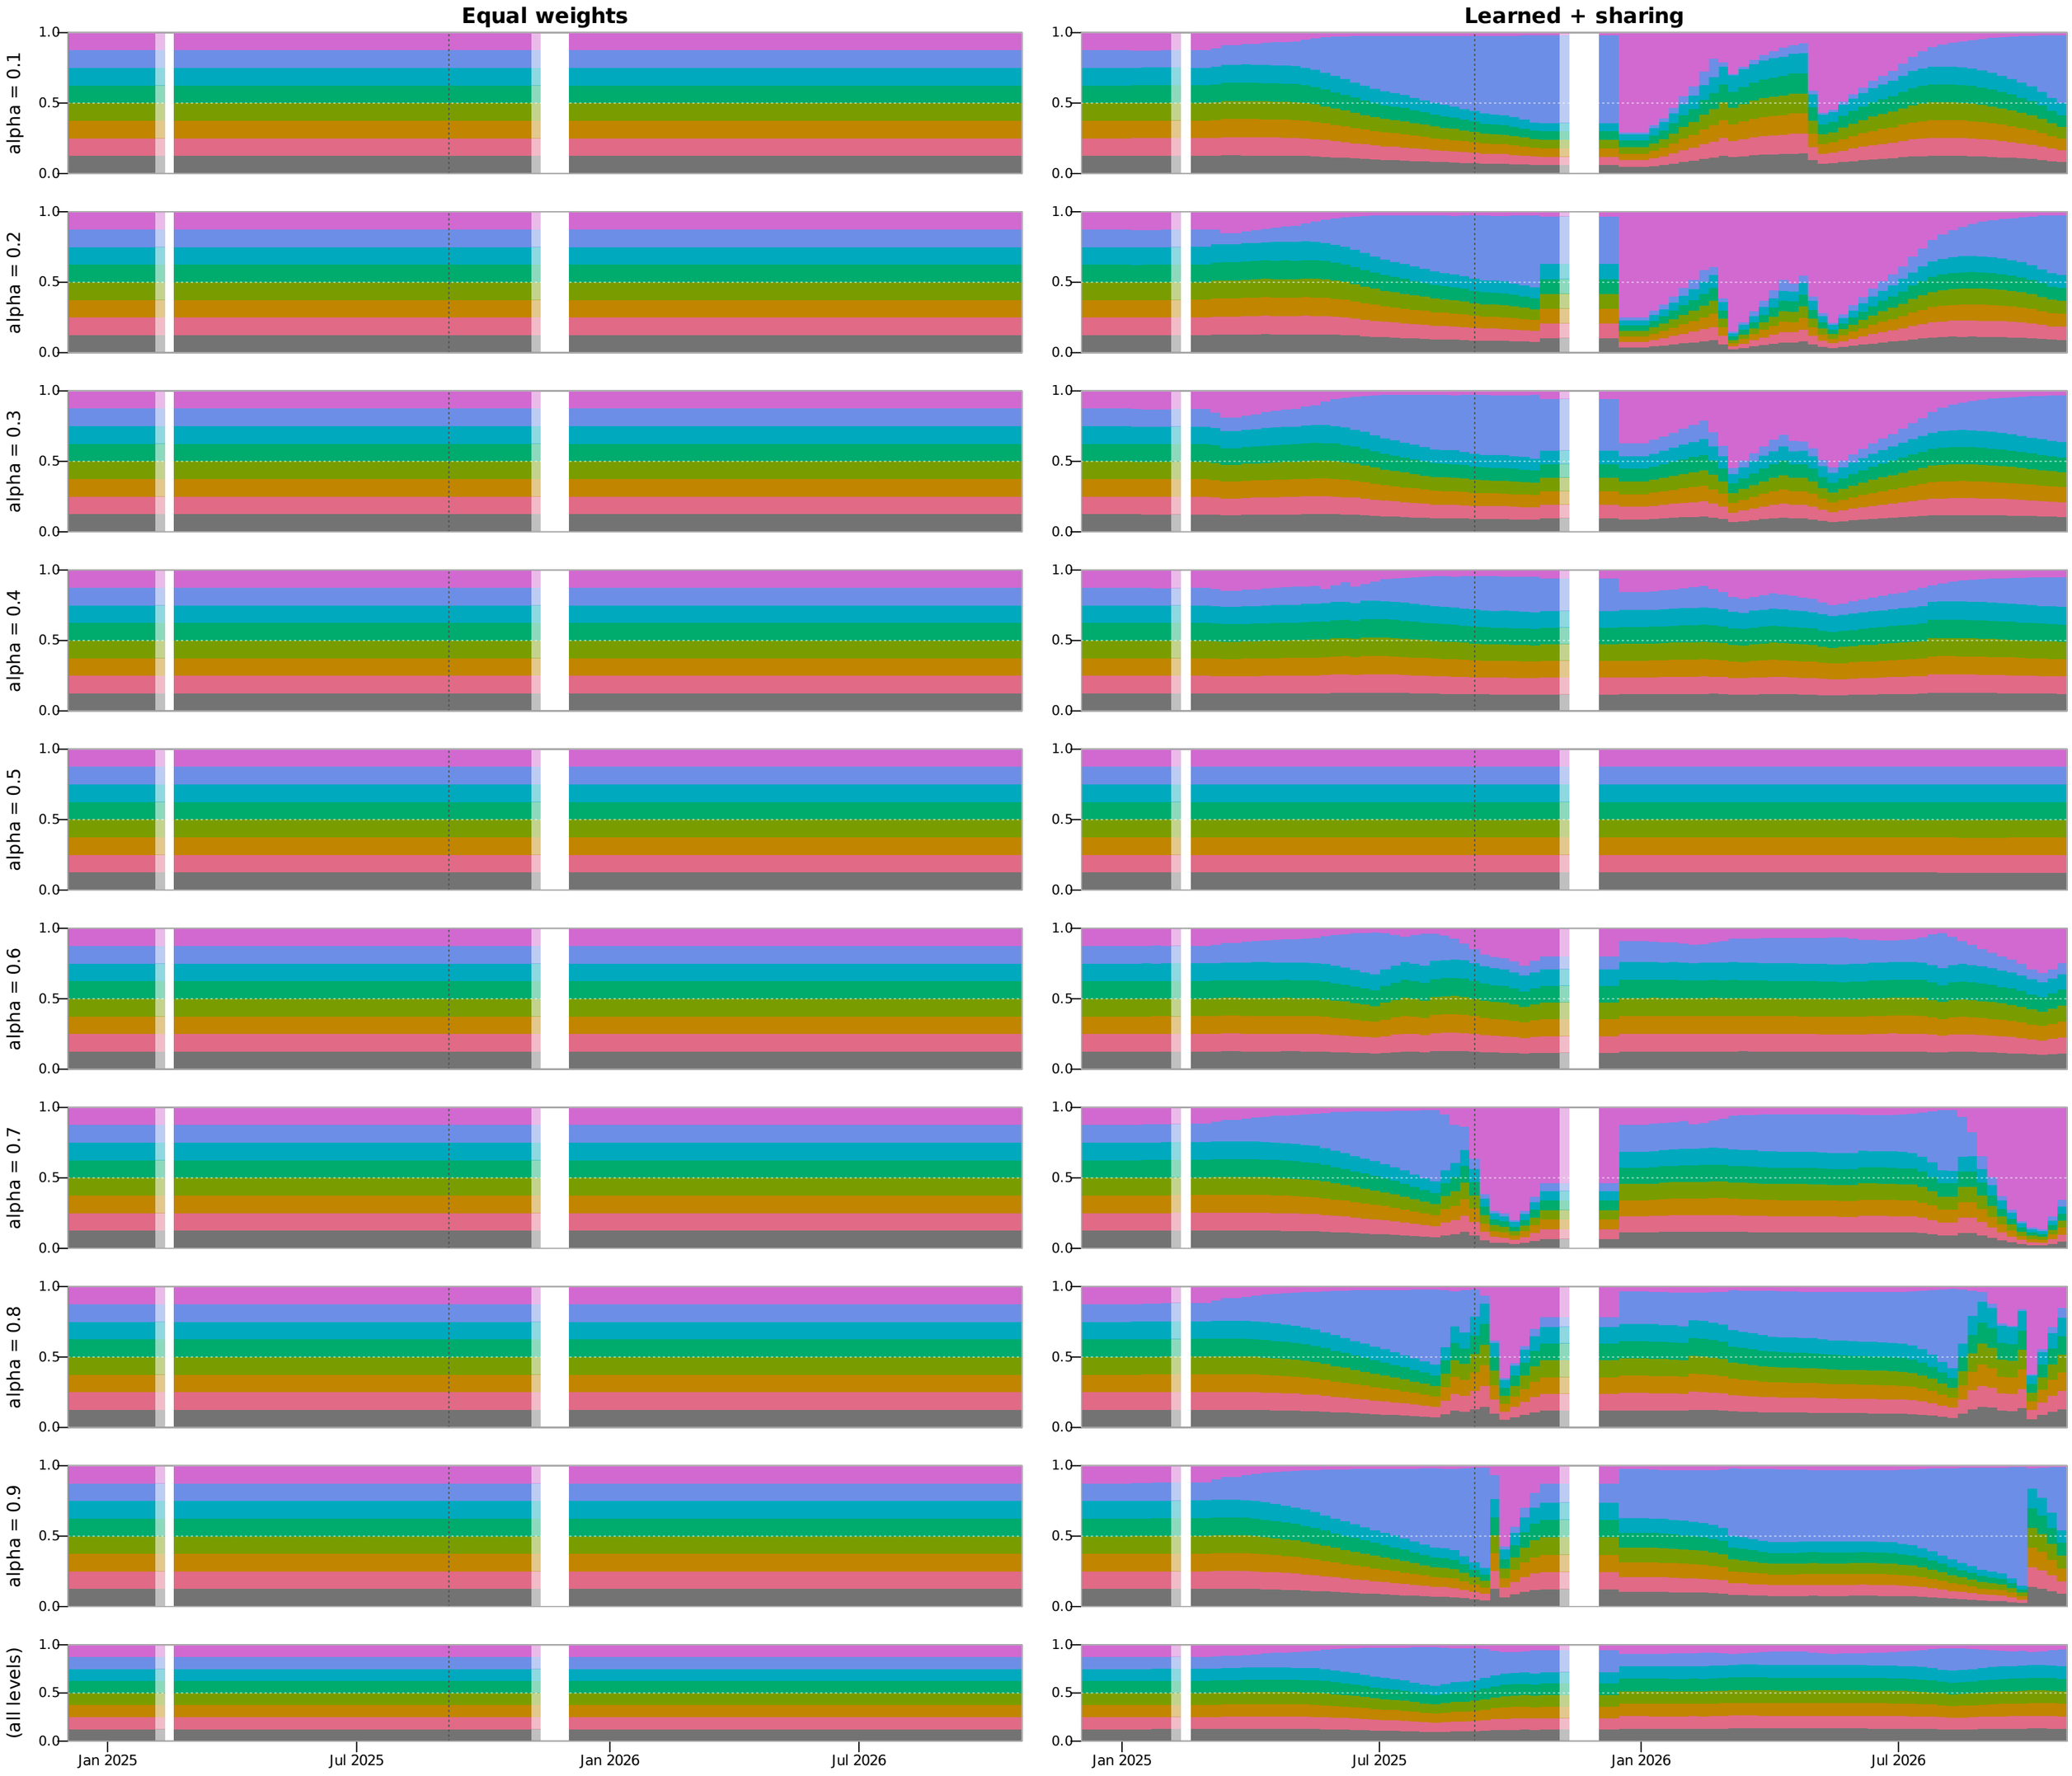

Target date | Weight at issuance for each target | Dotted line: peak

Rows alpha = 0.1-0.9: one weight vector per quantile level. Last row: one weight vector for all levels, learned from the mean pinball loss.

Lighter bars: rounds without a CMU forecast, filled with the latest earlier CMU forecast of the same target week.

Diverse expert weights

covid | horizon 2 | United States (US) | full history | raw-count updates | feedback delay 2 week(s)

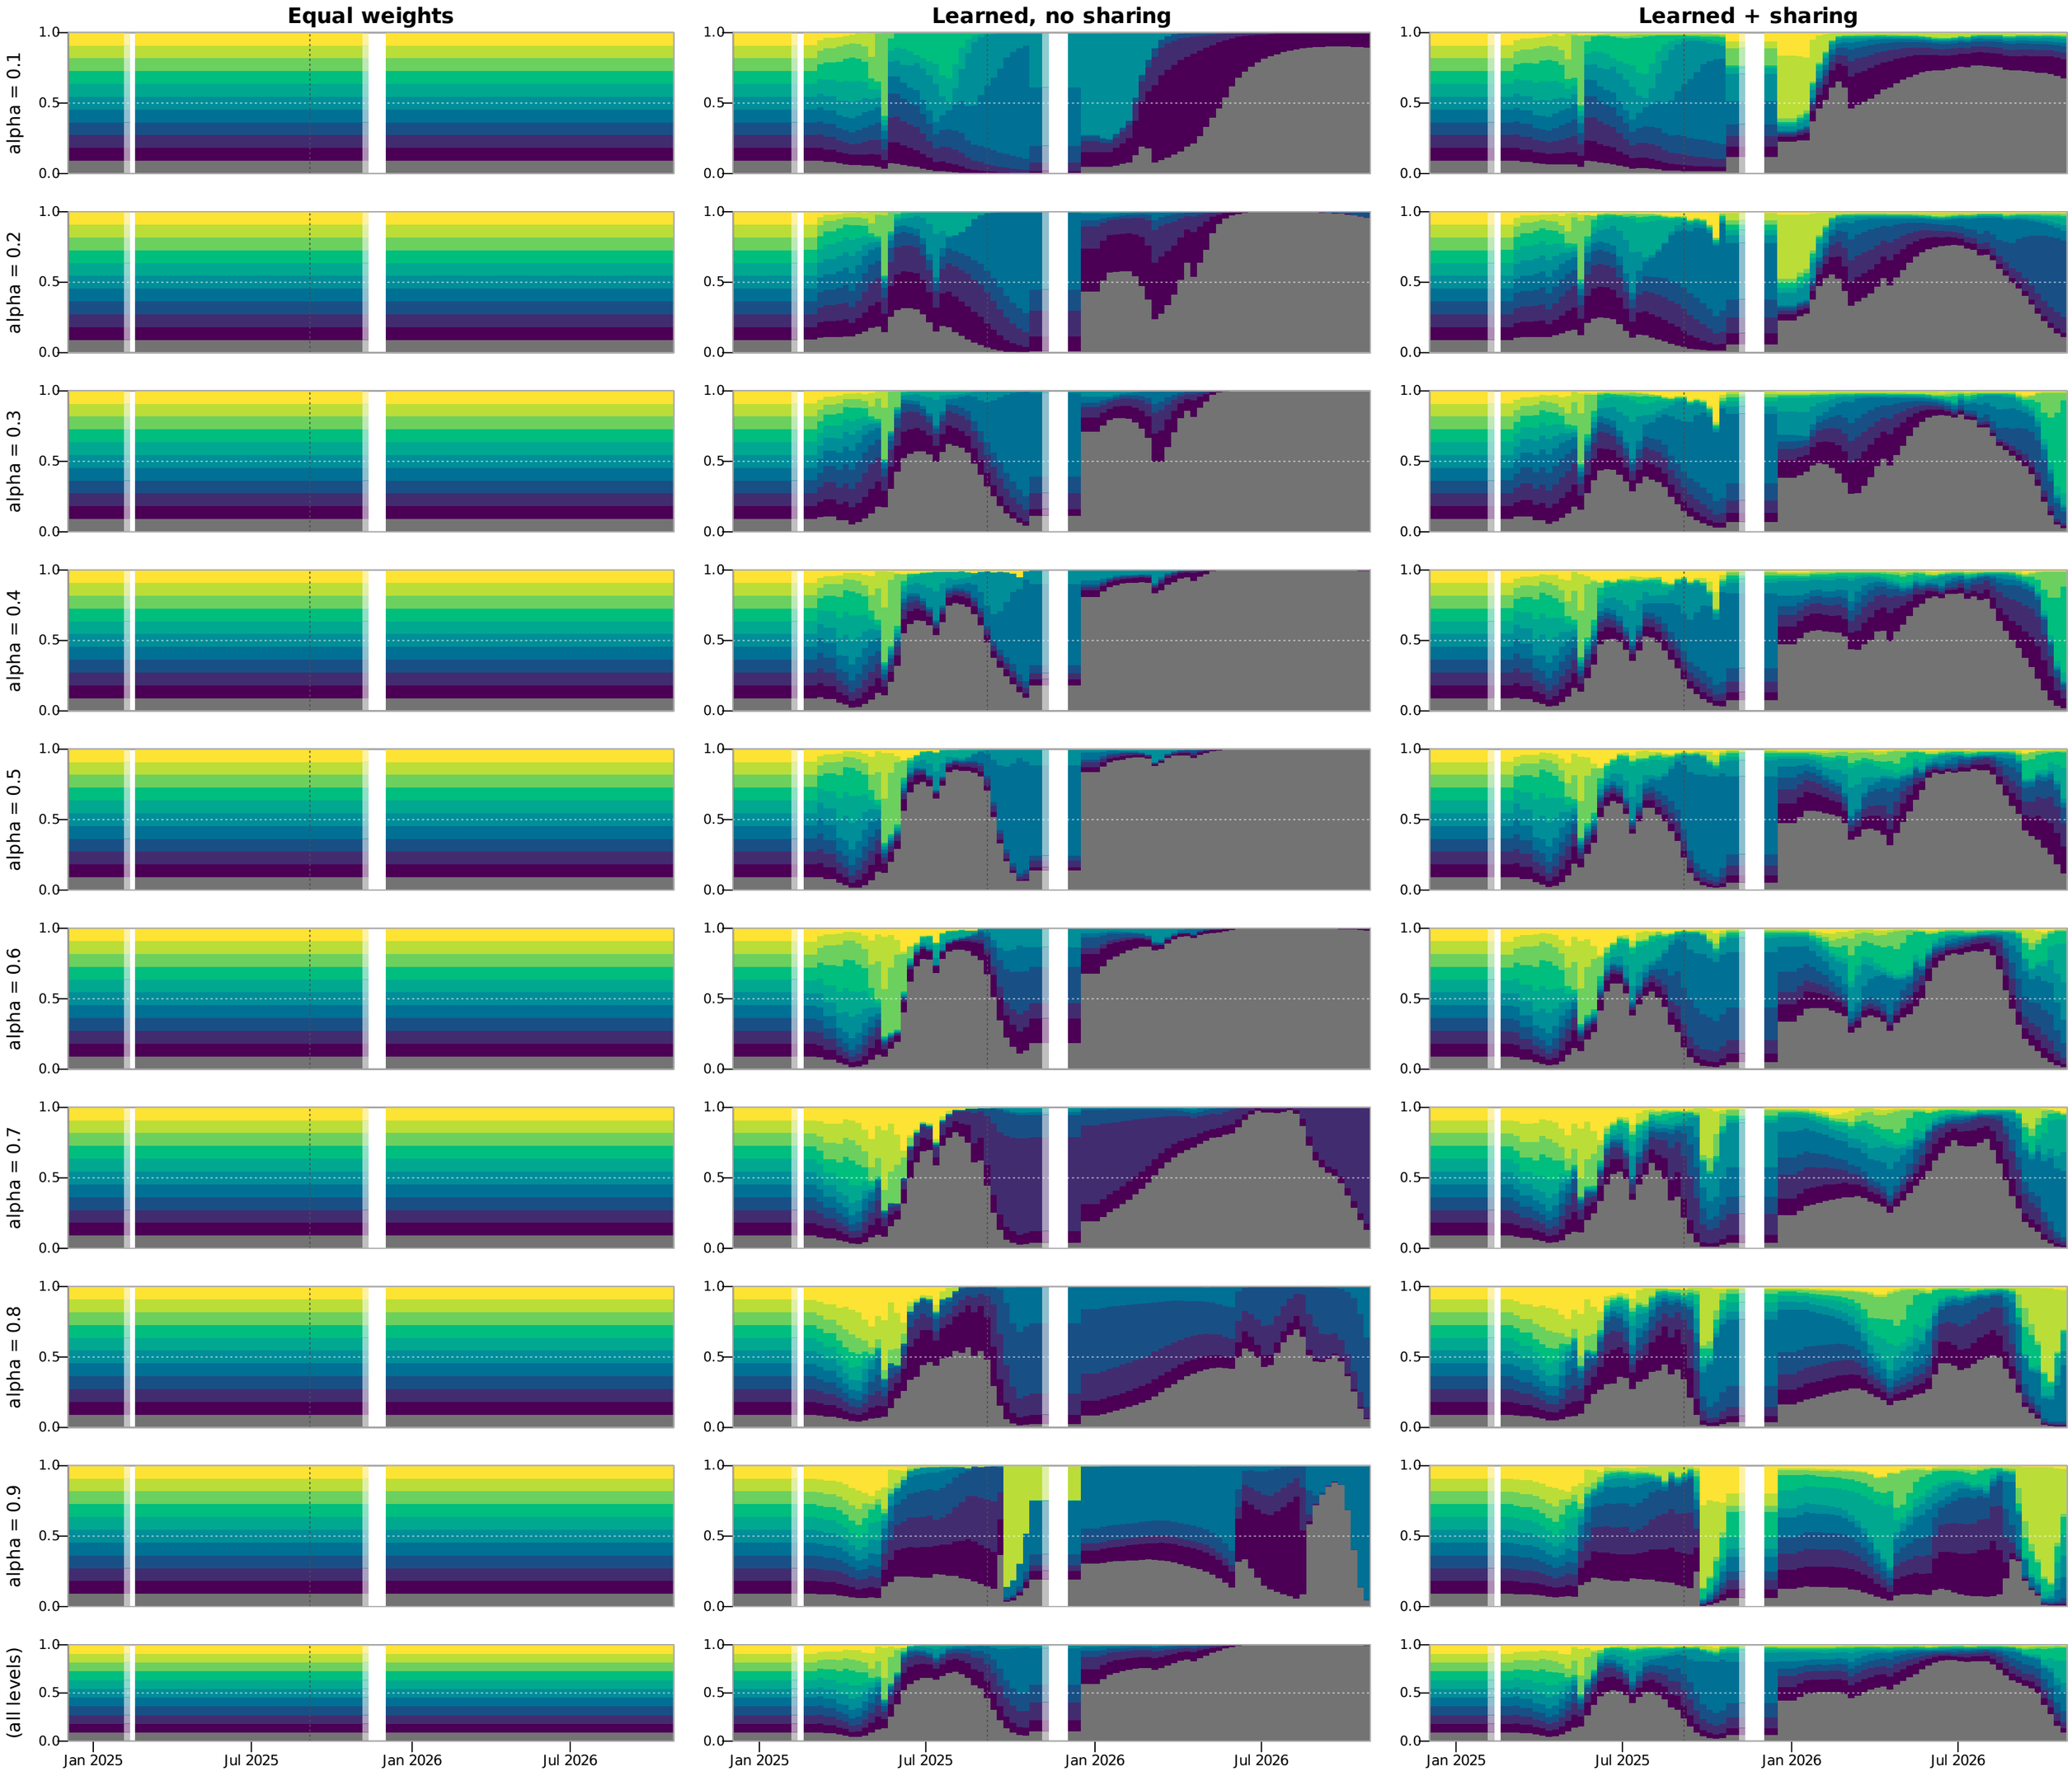

Target date | Weight at issuance for each target | Dotted line: peak

Rows alpha = 0.1-0.9: one weight vector per quantile level. Last row: one weight vector for all levels, learned from the mean pinball loss.

Lighter bars: rounds without a CMU forecast, filled with the latest earlier CMU forecast of the same target week.

Frozen rate-grid weights

covid | horizon 2 | California (06) | full history | raw-count updates | feedback delay 2 week(s)

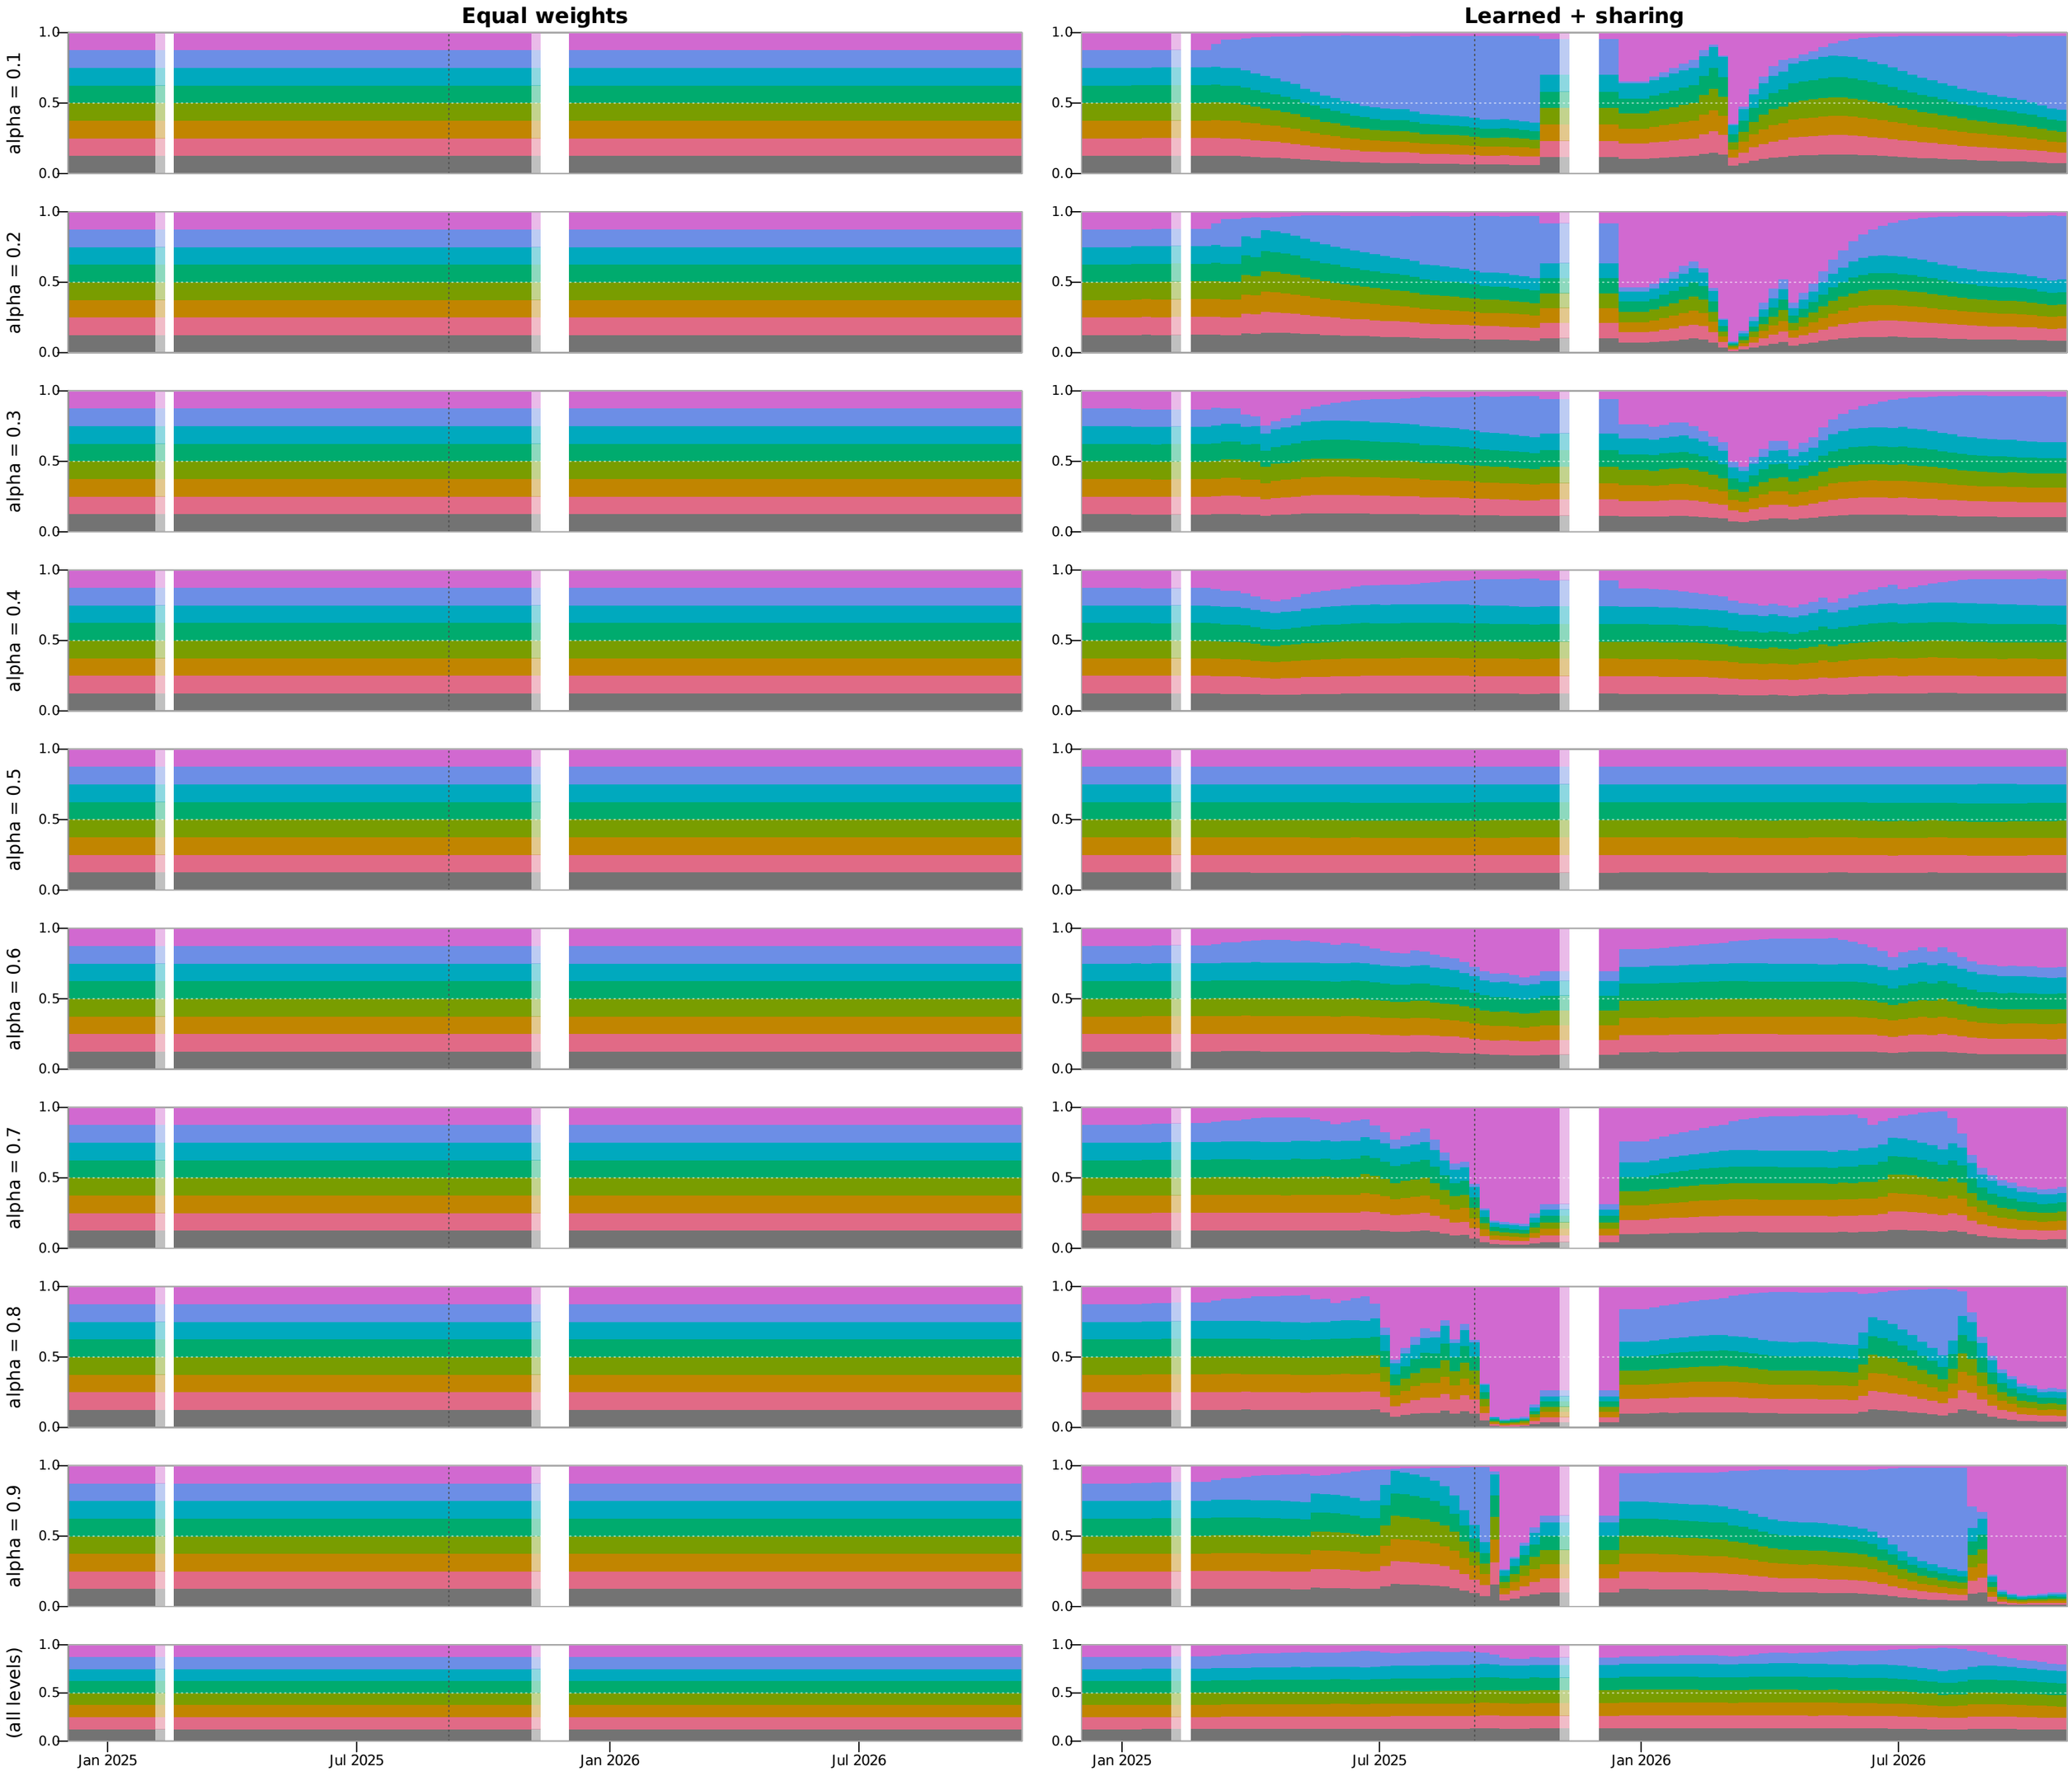

Target date | Weight at issuance for each target | Dotted line: peak

Rows alpha = 0.1-0.9: one weight vector per quantile level. Last row: one weight vector for all levels, learned from the mean pinball loss.

Lighter bars: rounds without a CMU forecast, filled with the latest earlier CMU forecast of the same target week.
