The 10 largest locations without Florida pooled | Fixed-rate MultiQT: calibration error vs mean quantile loss, mean over quantile levels

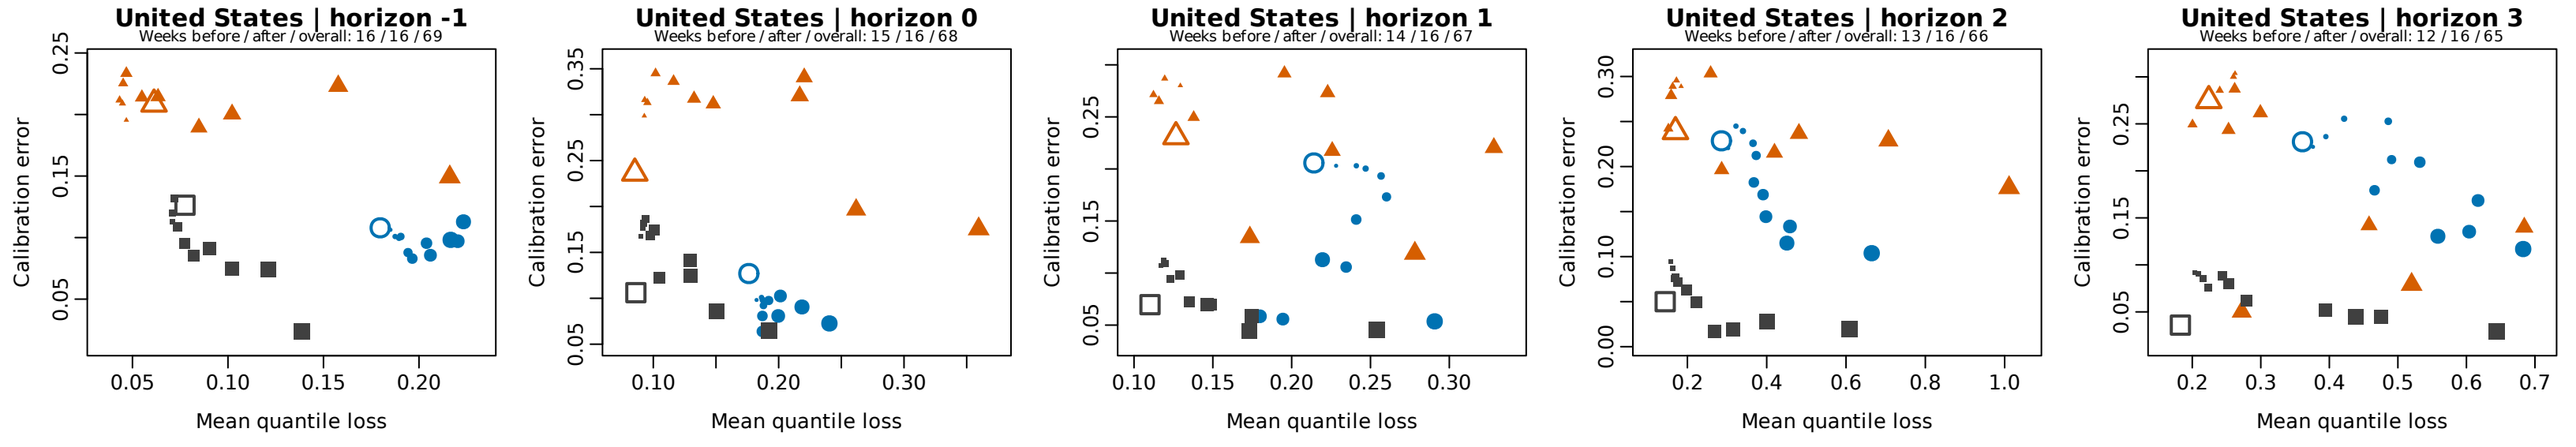

Count tracking | means over the locations, each with its own S0 | lines join the rates of a window in increasing order | Lower left is better.

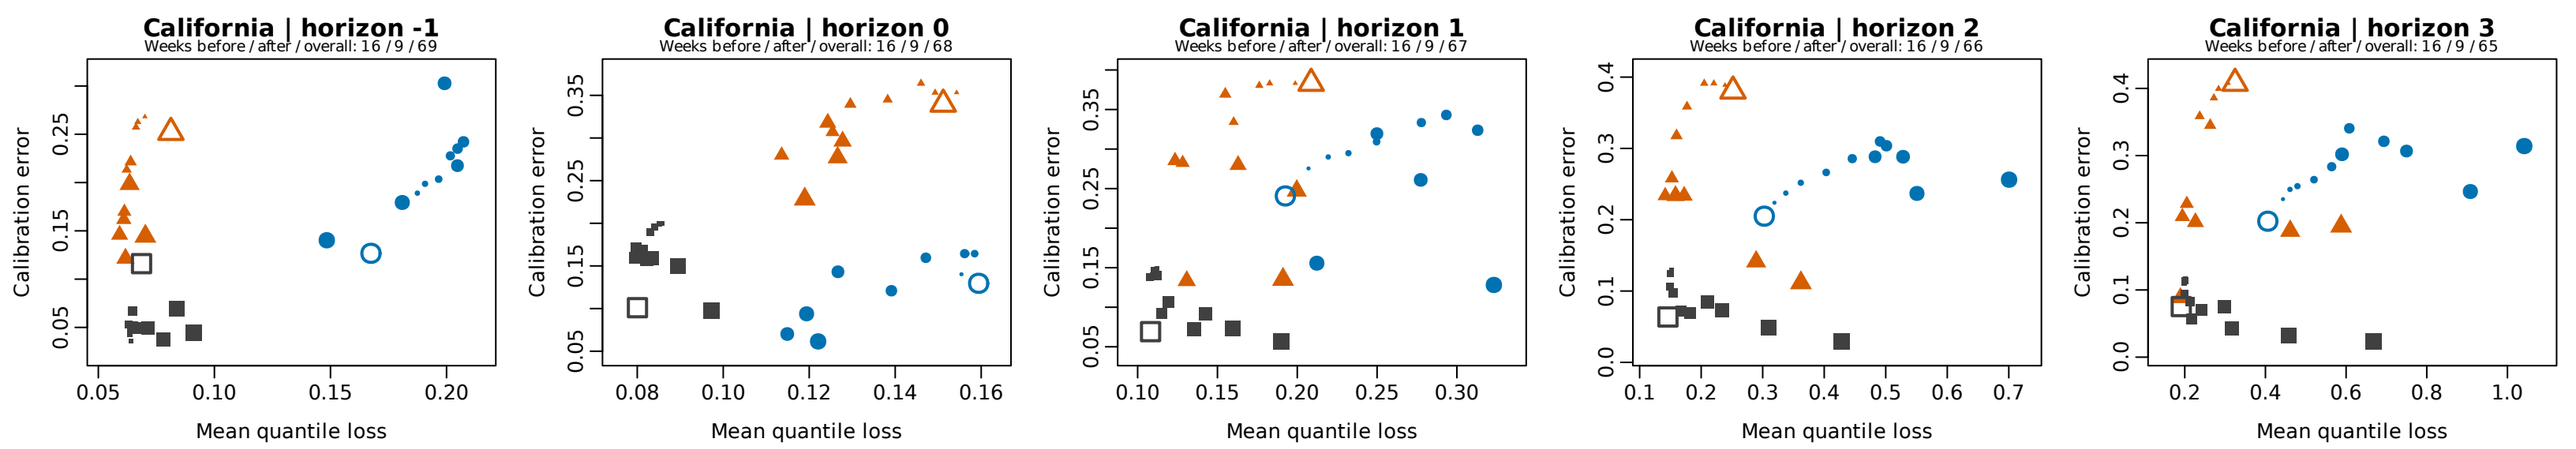

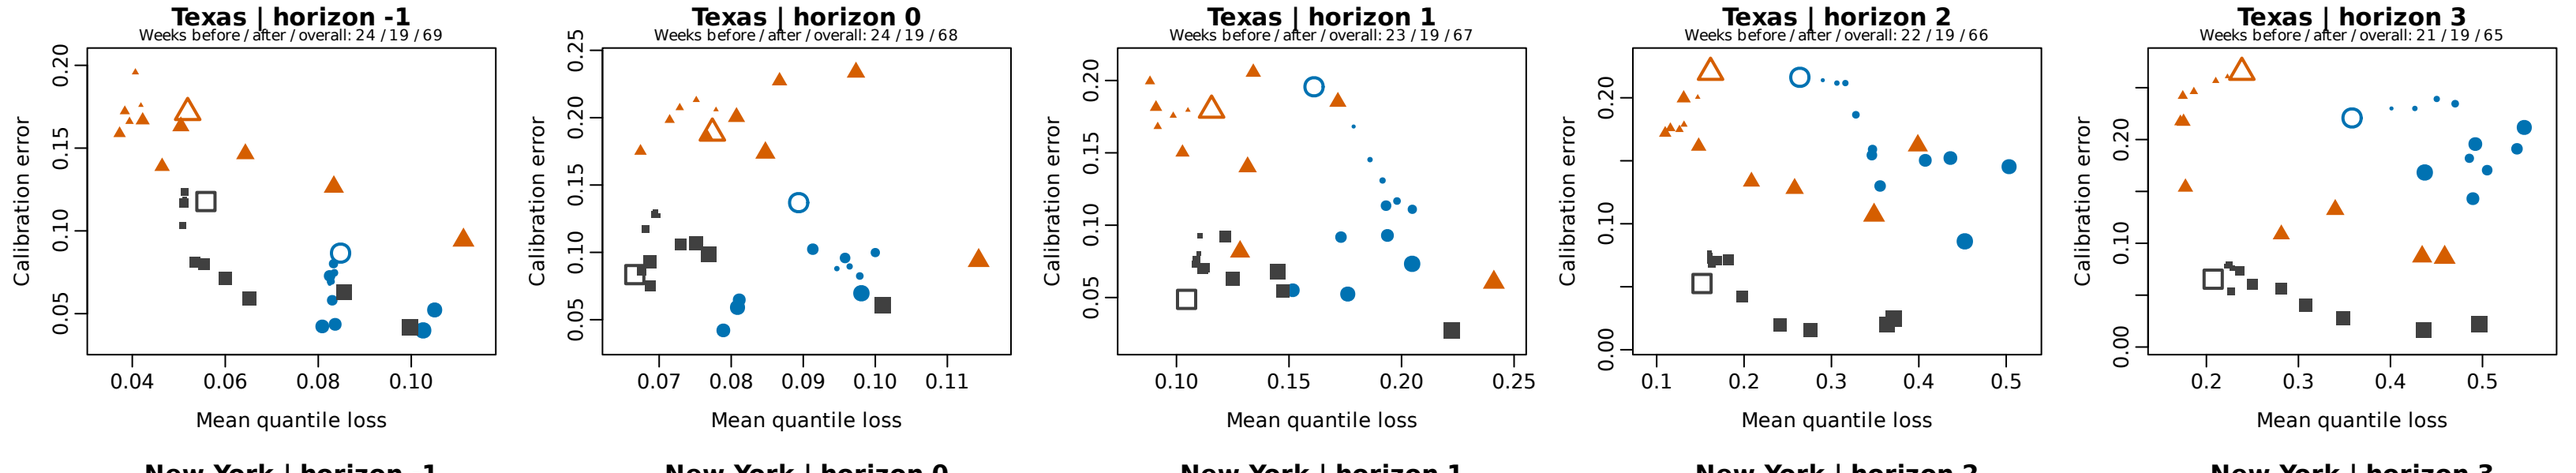

COVID | delay 0 | Fixed-rate MultiQT: calibration error vs mean quantile loss, mean over quantile levels

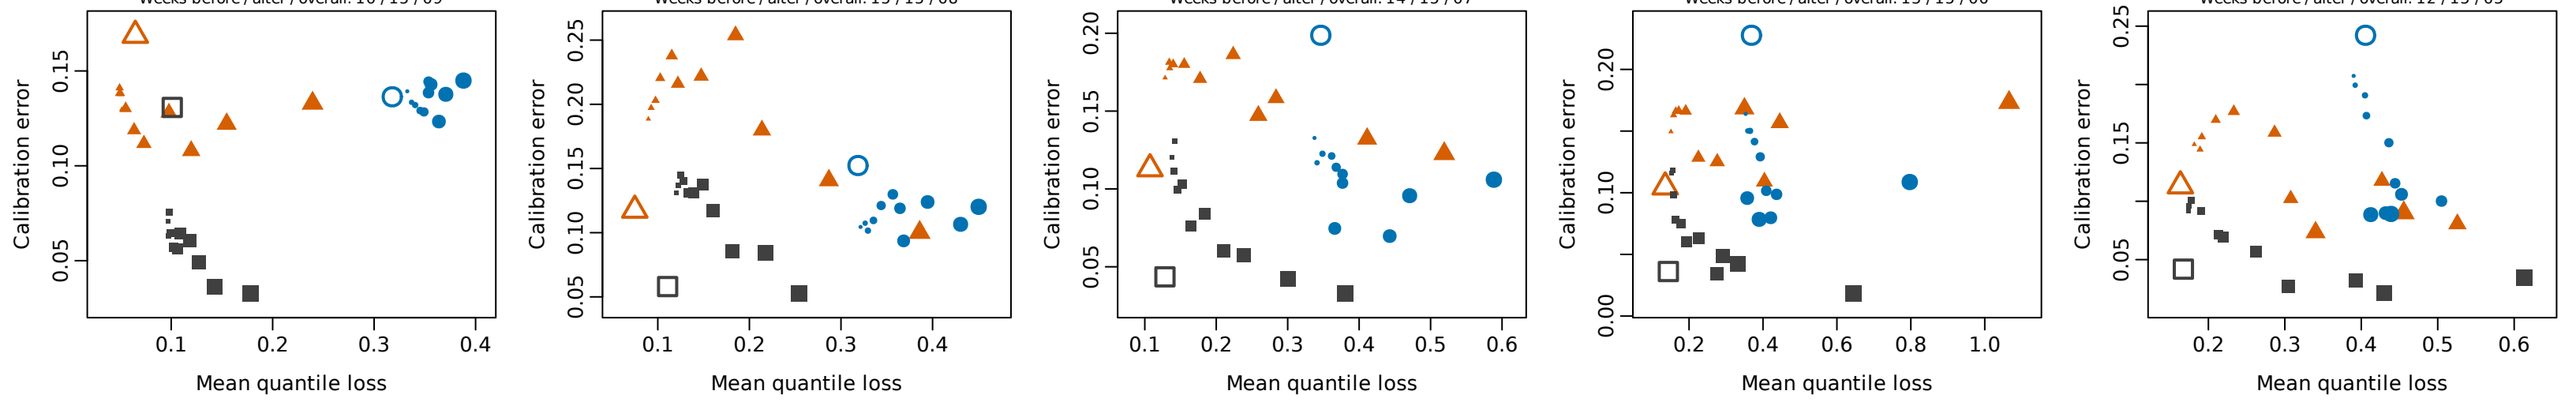

Count tracking | eta = m * S0, S0 frozen after 20 released rows (in hindsight: warmup replayed) | Feedback delay 0 | Scored against latest reported counts in counts per 100k residents | Lower left is better.

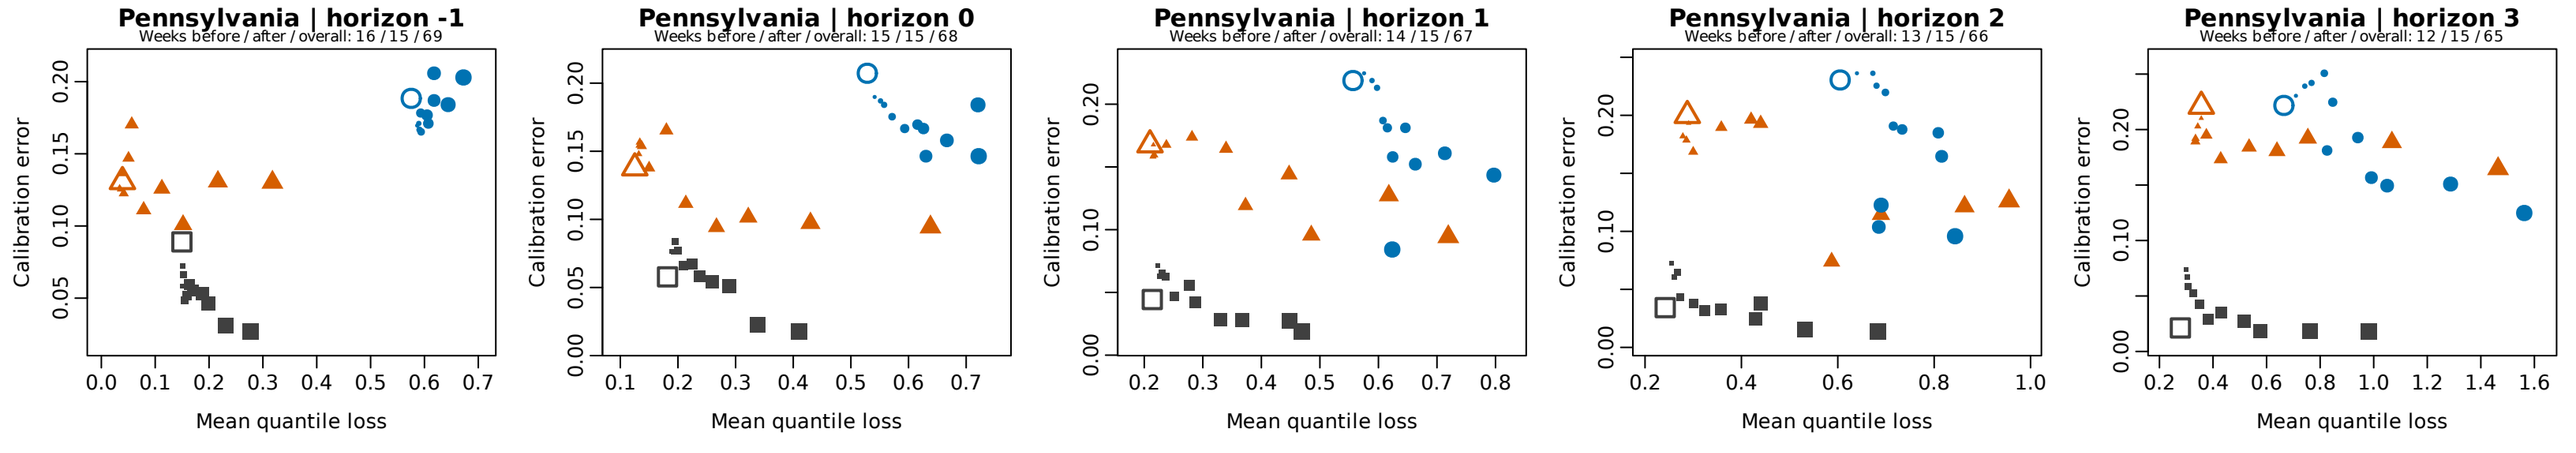

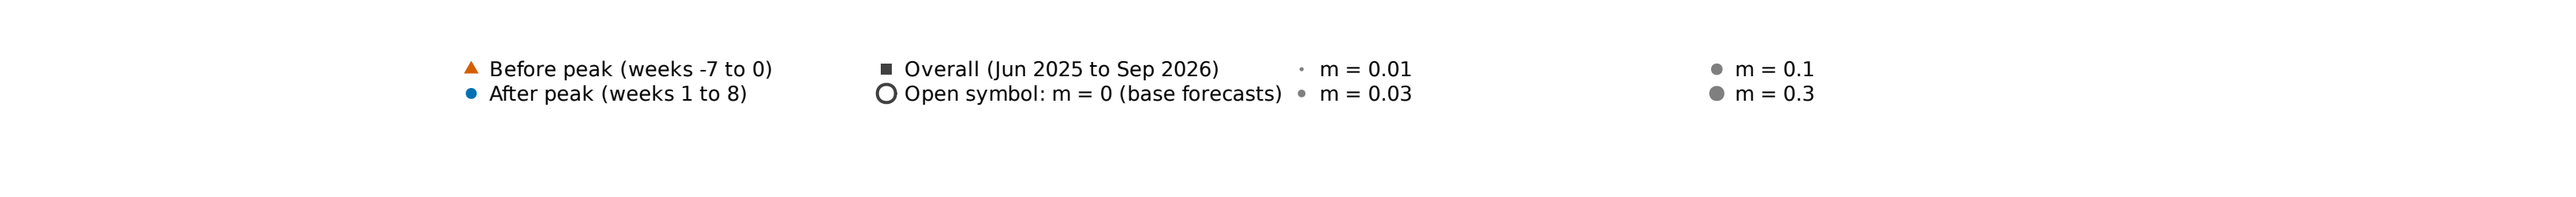

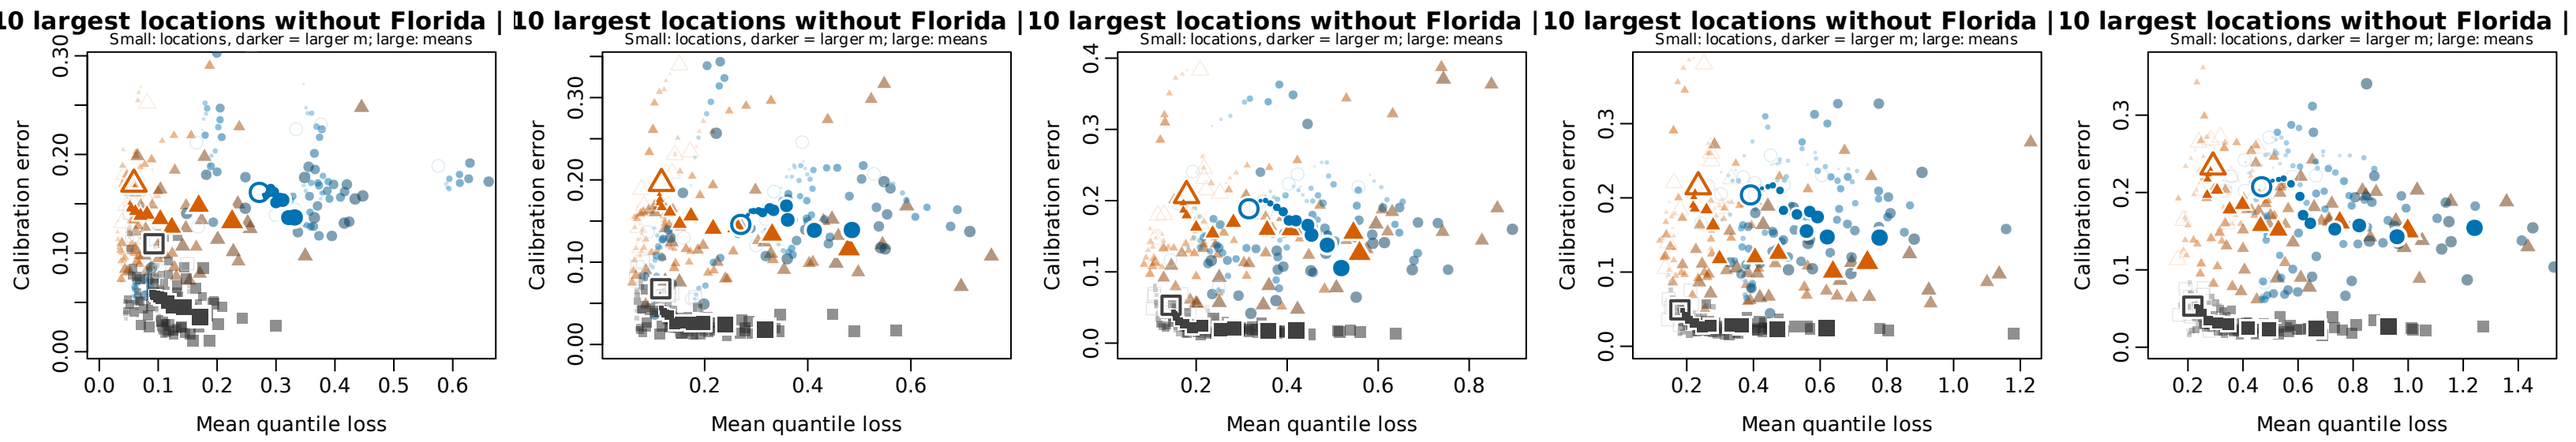

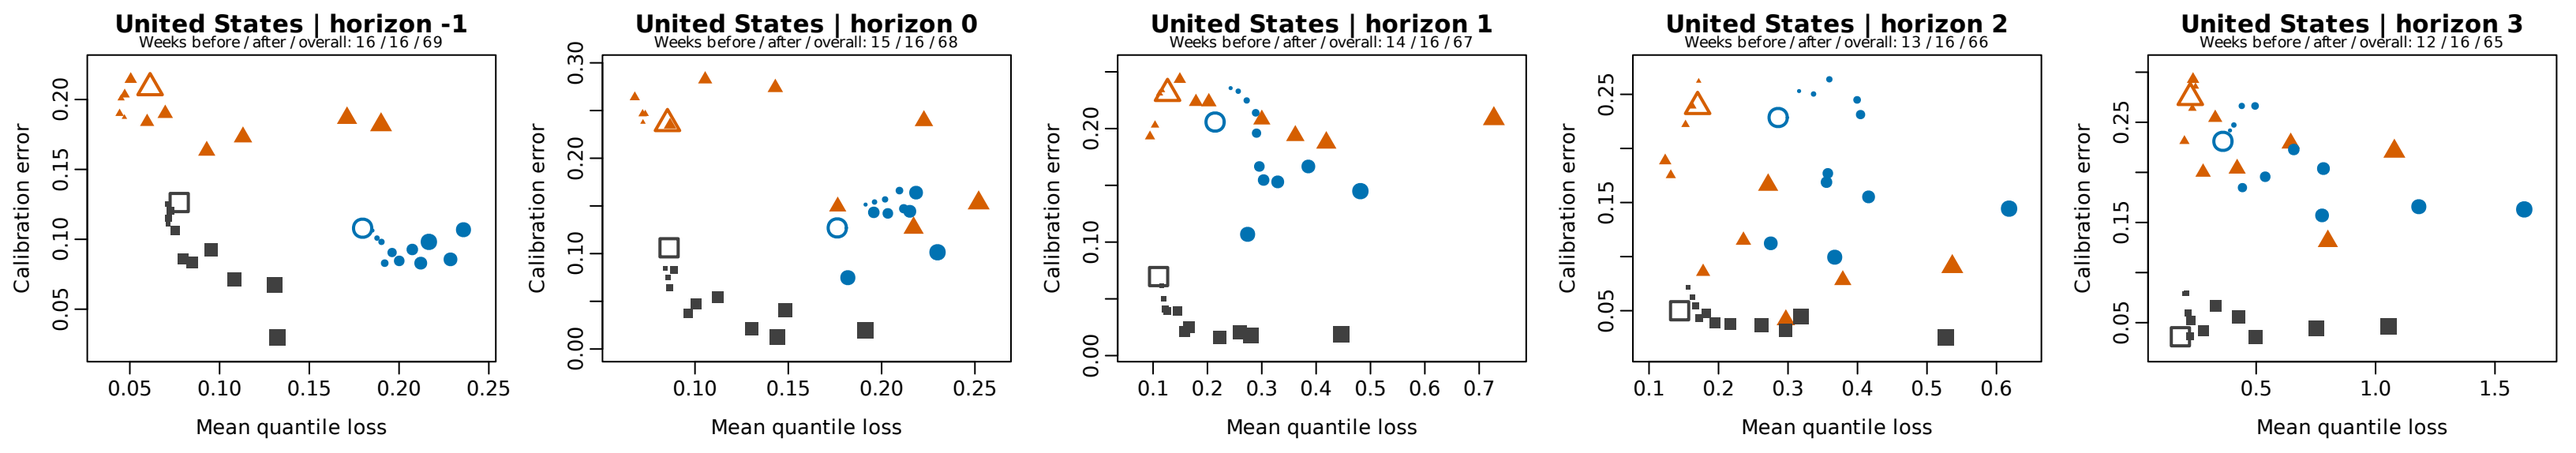

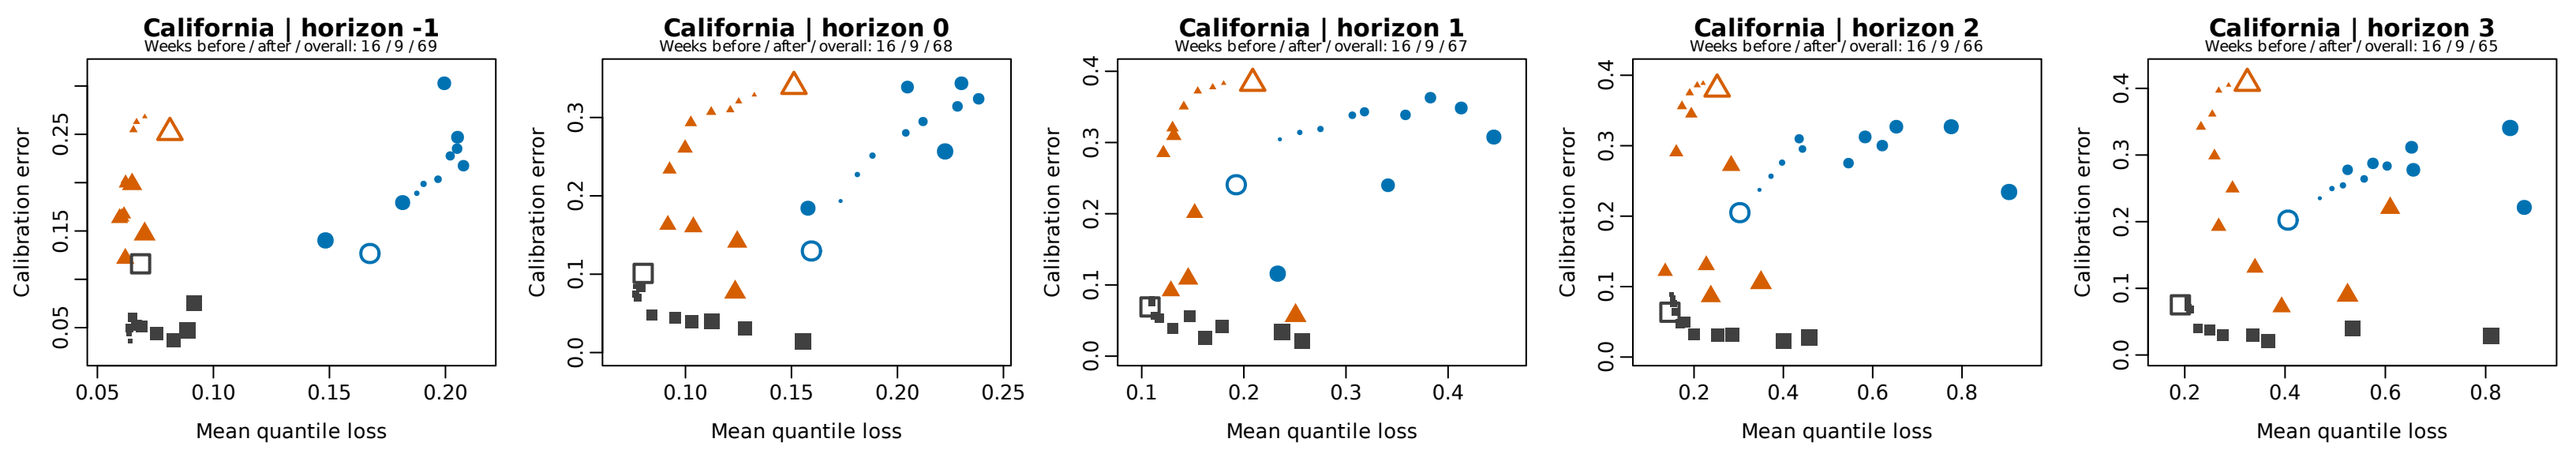

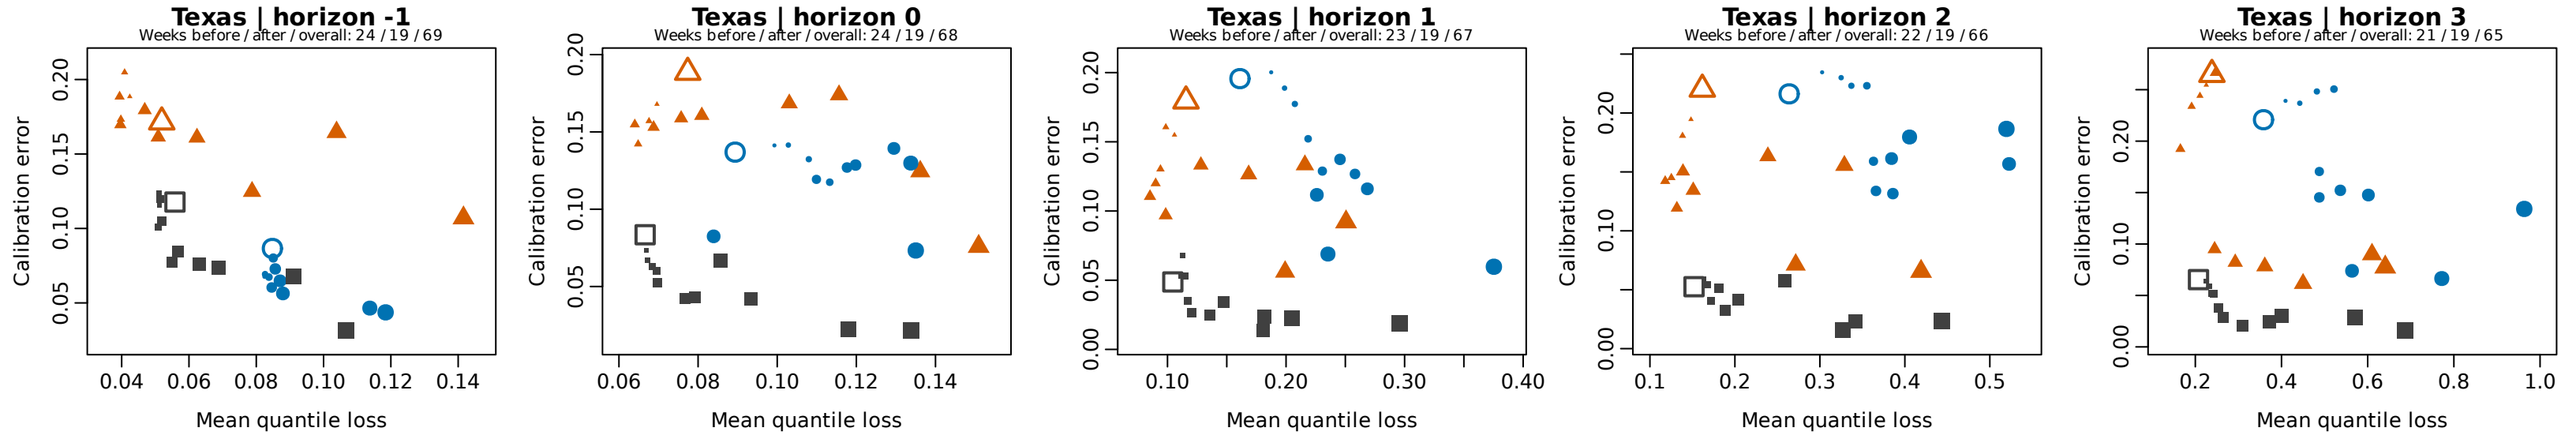

COVID | delay 1 | Fixed-rate MultiQT: calibration error vs mean quantile loss, mean over quantile levels

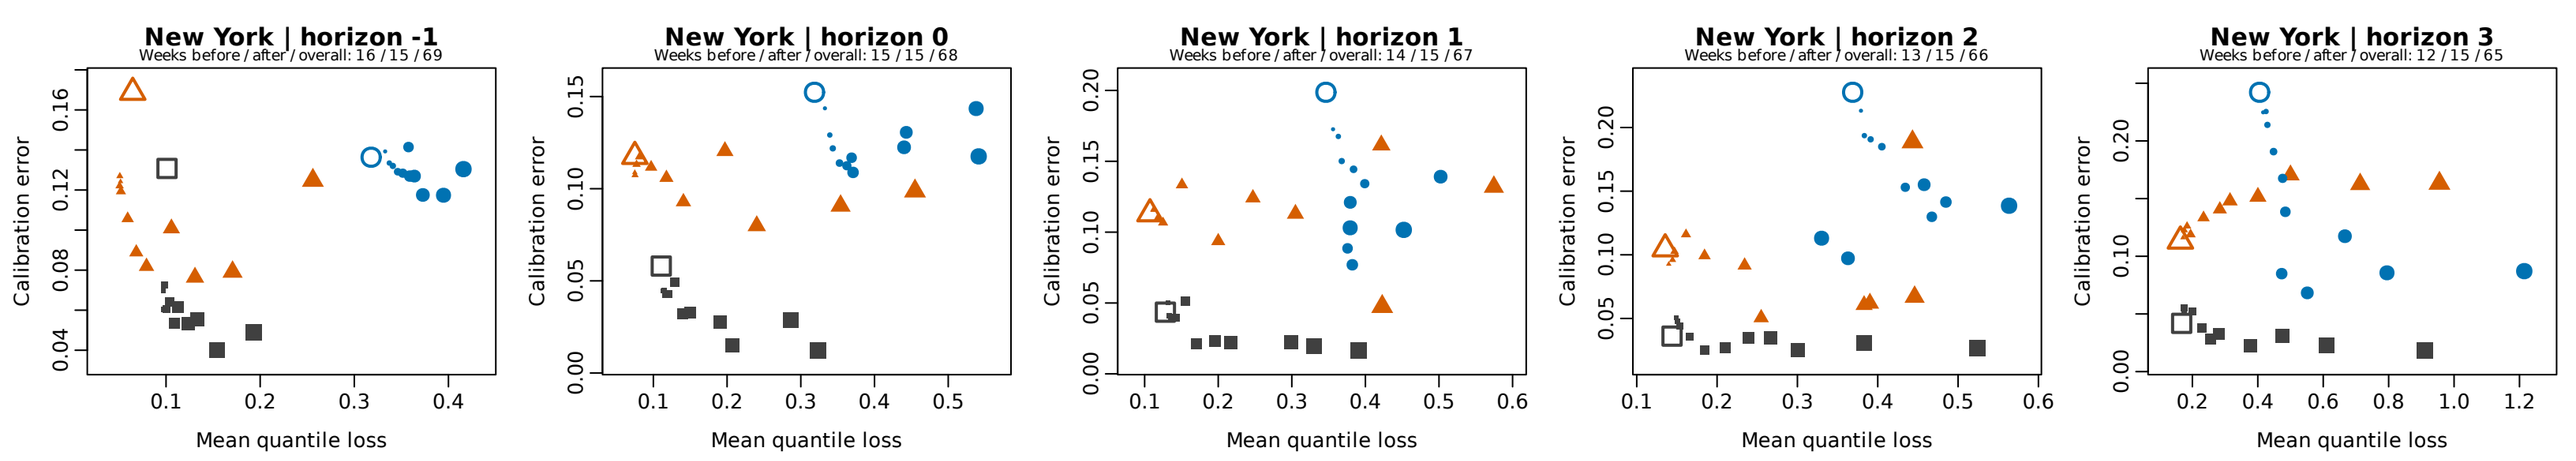

Count tracking | eta = m * S0, S0 frozen after 20 released rows (in hindsight: warmup replayed) | Feedback delay 1 | Scored against latest reported counts in counts per 100k residents | Lower left is better.

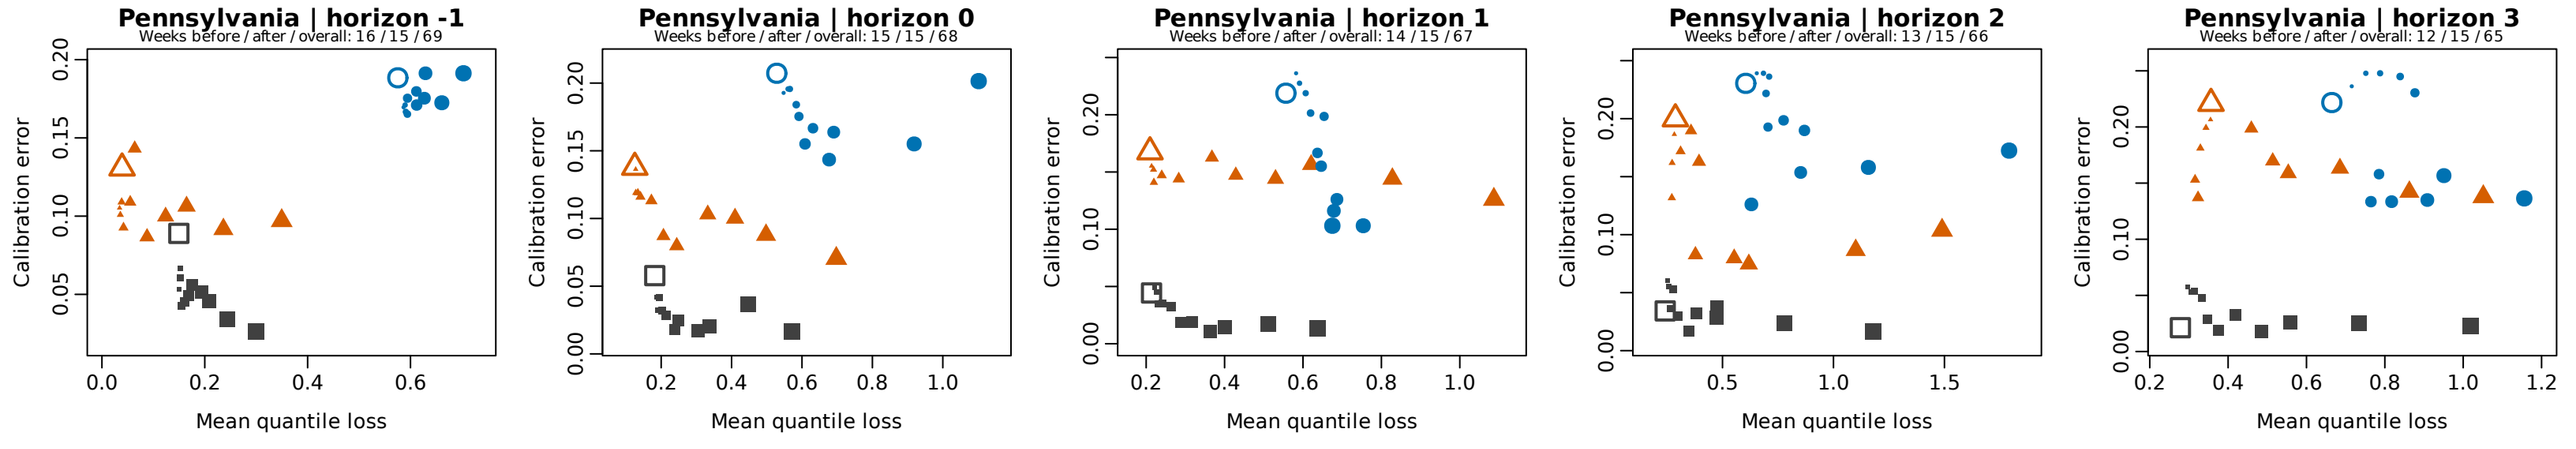

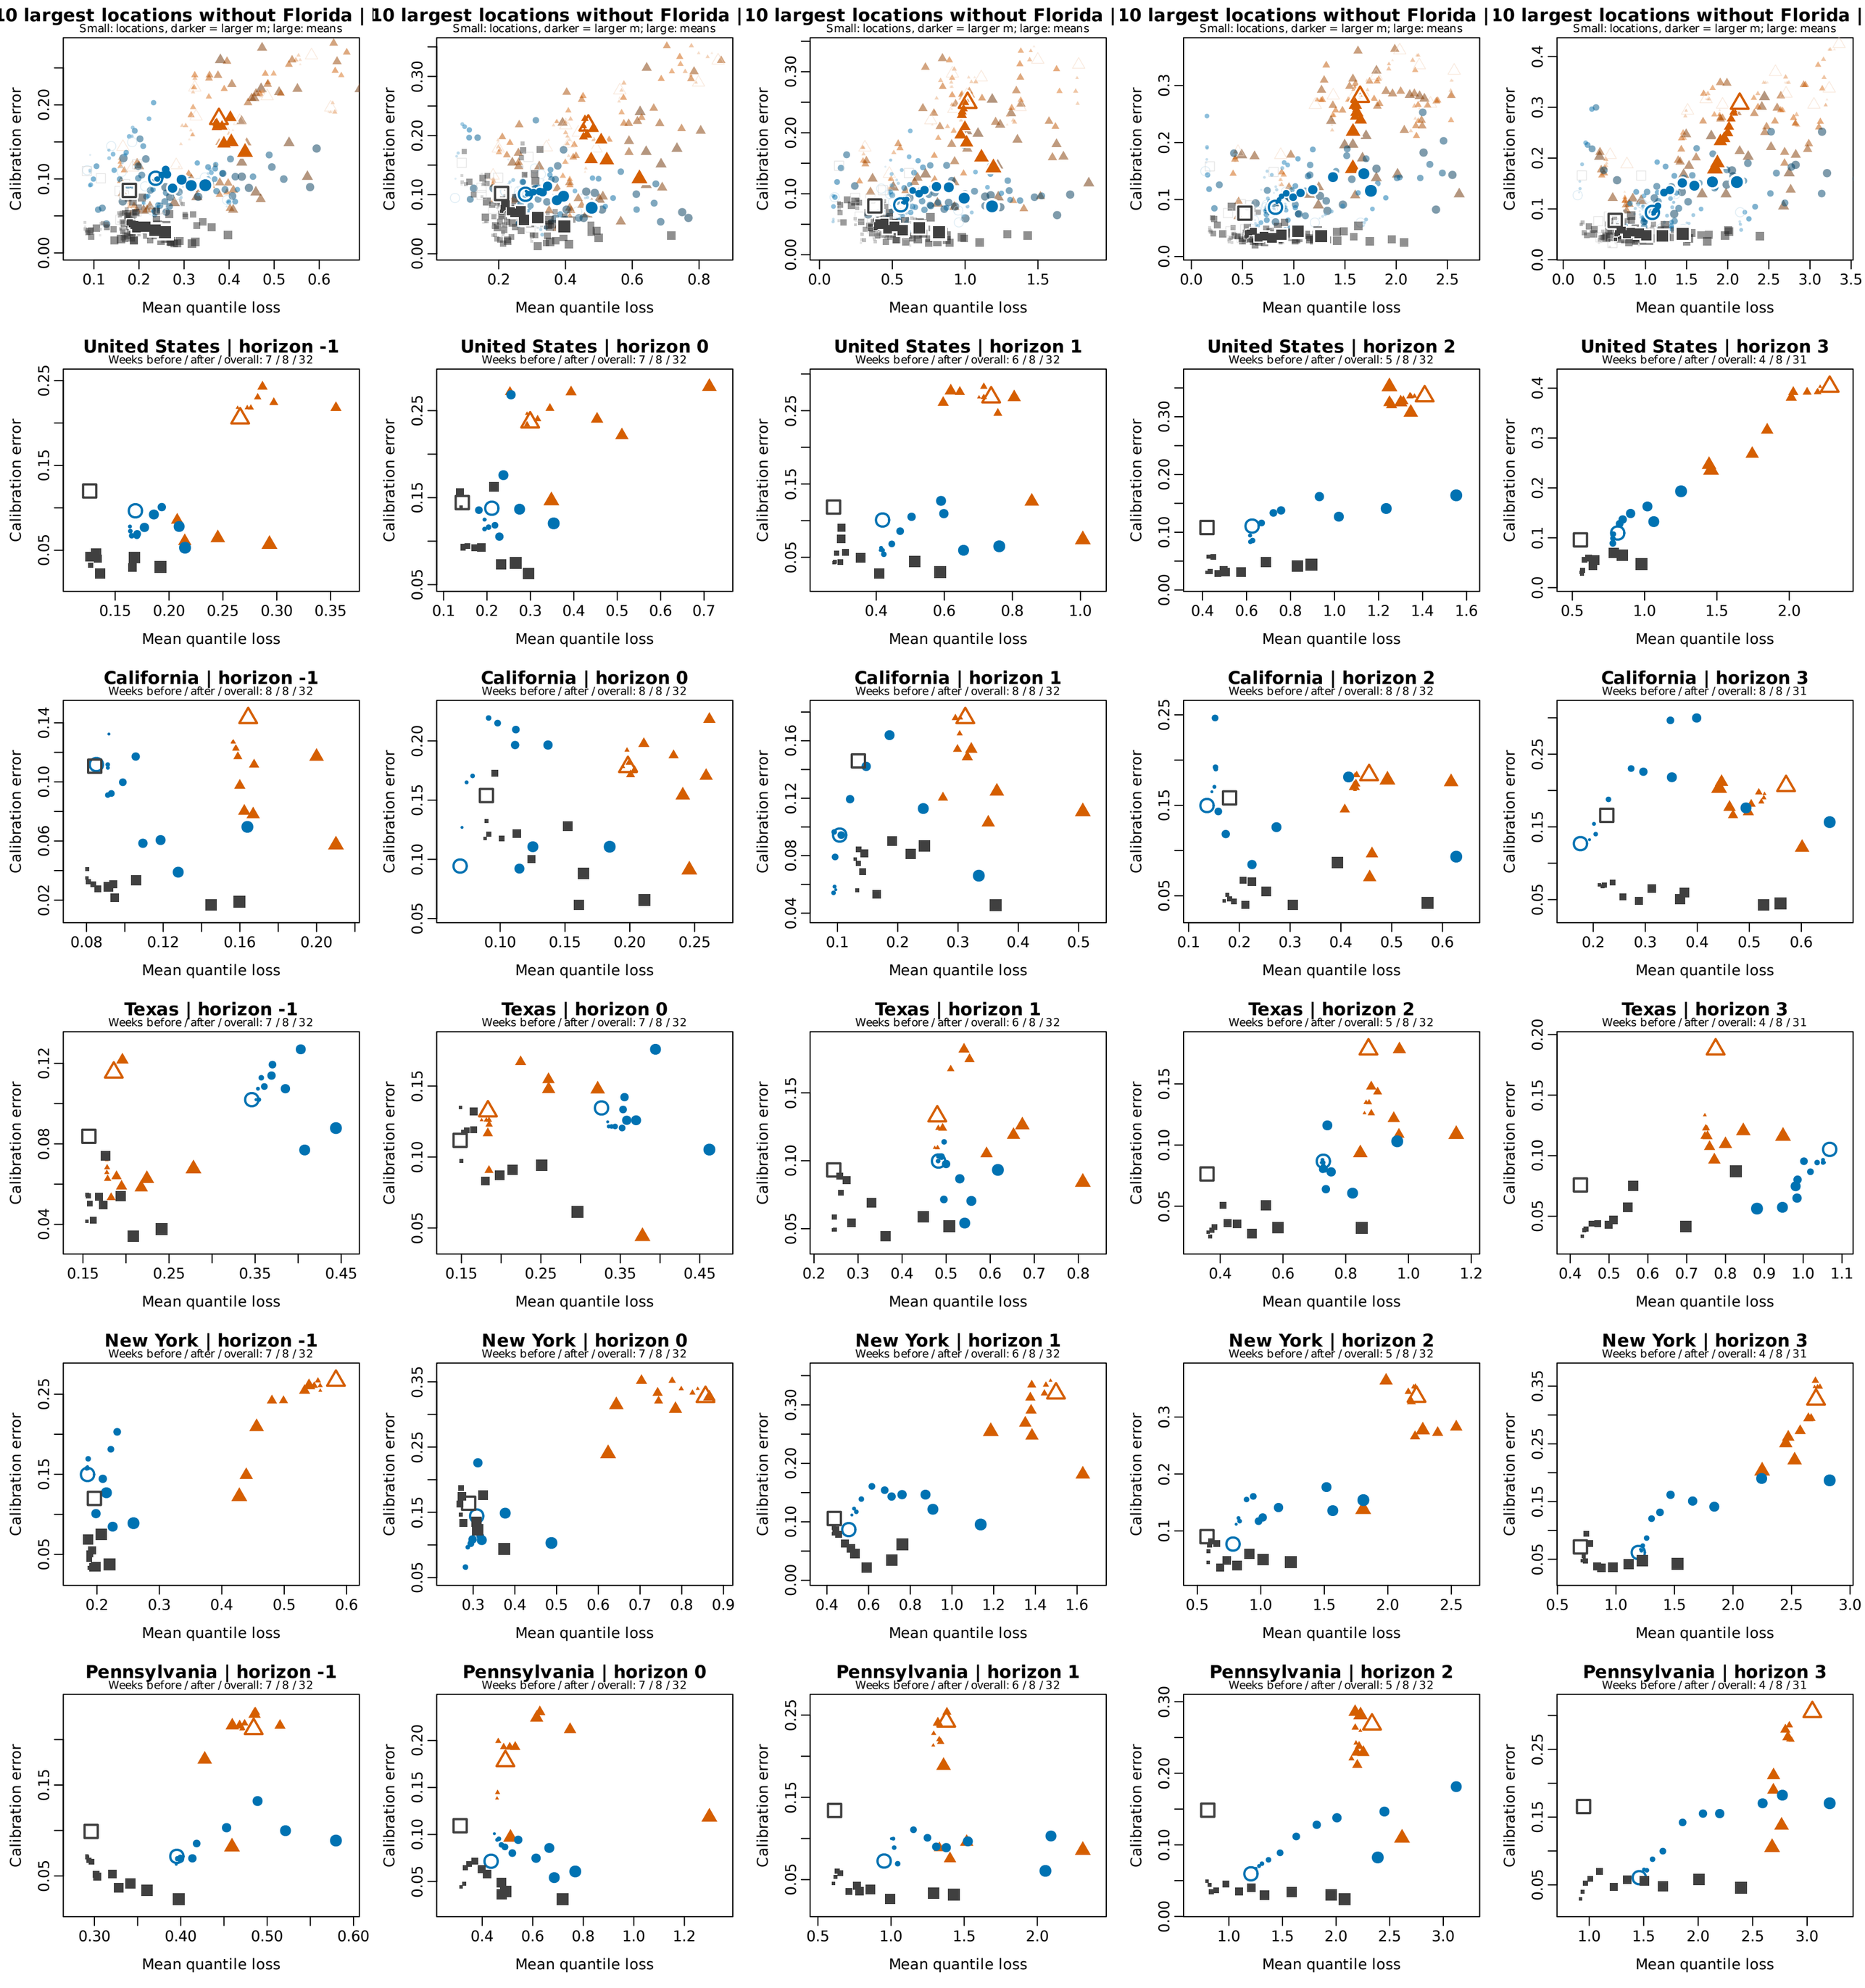

▲ Before peak (weeks -7 to 0)
● After peak (weeks 1 to 8)
■ Overall (Jun 2025 to Sep 2026)
○ Open symbol: m = 0 (base forecasts)
· m = 0.01
• m = 0.03
● m = 0.1
● m = 0.3

COVID | re-run | Fixed-rate MultiQT: calibration error vs mean quantile loss, mean over quantile levels

Count tracking | eta = m * S0, S0 frozen after 20 released rows (in hindsight: warmup replayed) | Feedback re-run | Scored against latest reported counts in counts per 100k residents | Lower left is better.

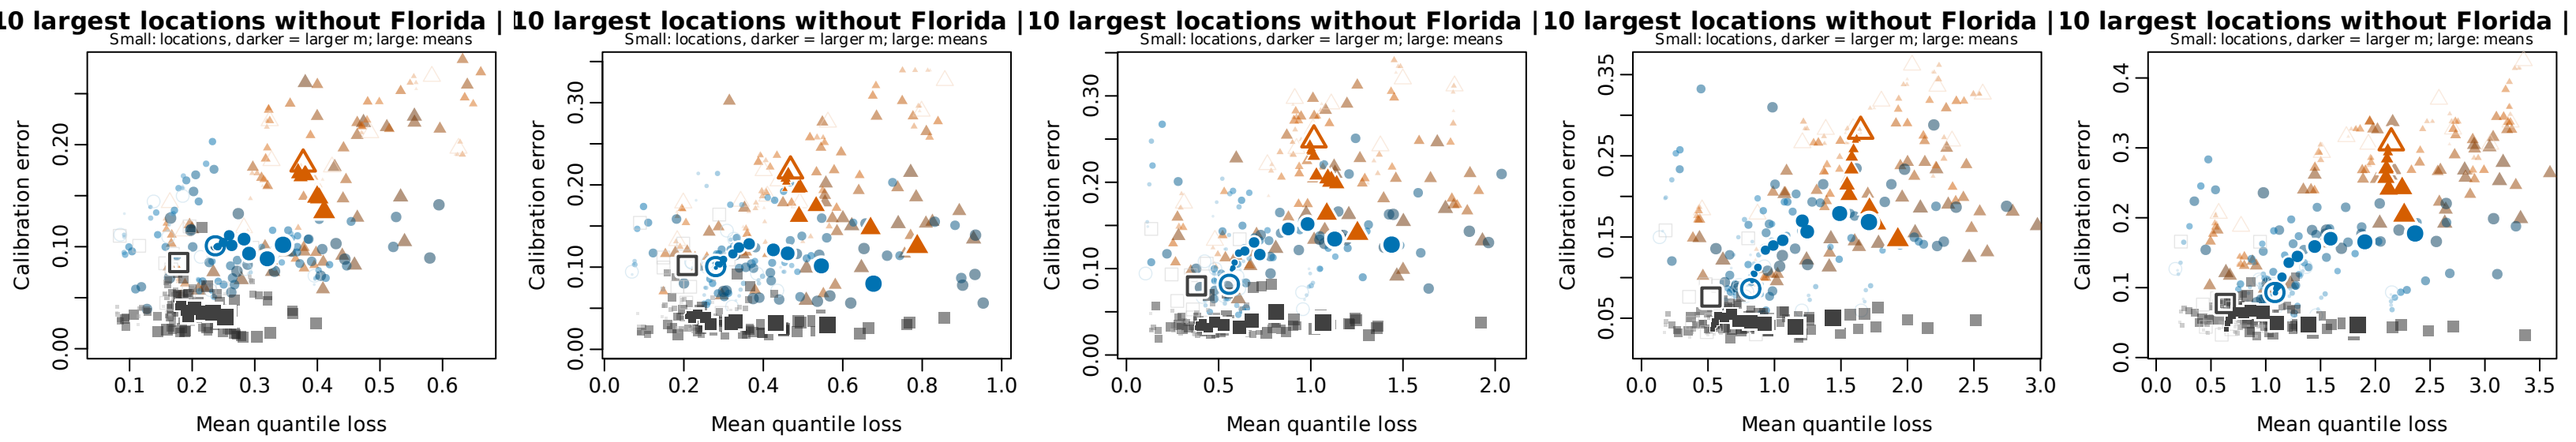

FLU | delay 0 | Fixed-rate MultiQT: calibration error vs mean quantile loss, mean over quantile levels

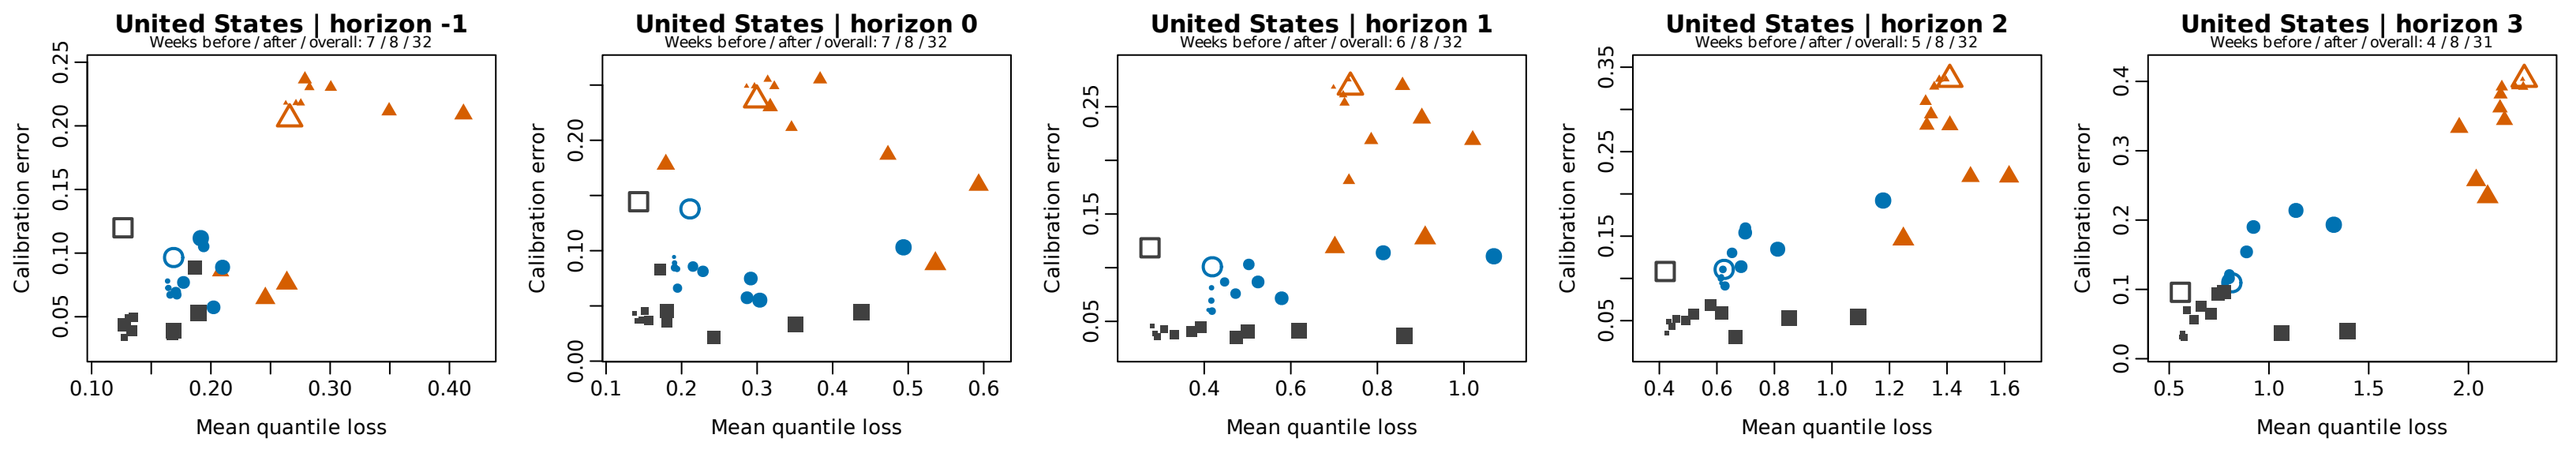

Count tracking | eta = m * S0, S0 frozen after 20 released rows (in hindsight: warmup replayed) | Feedback delay 0 | Scored against latest reported counts in counts per 100k residents | Lower left is better.

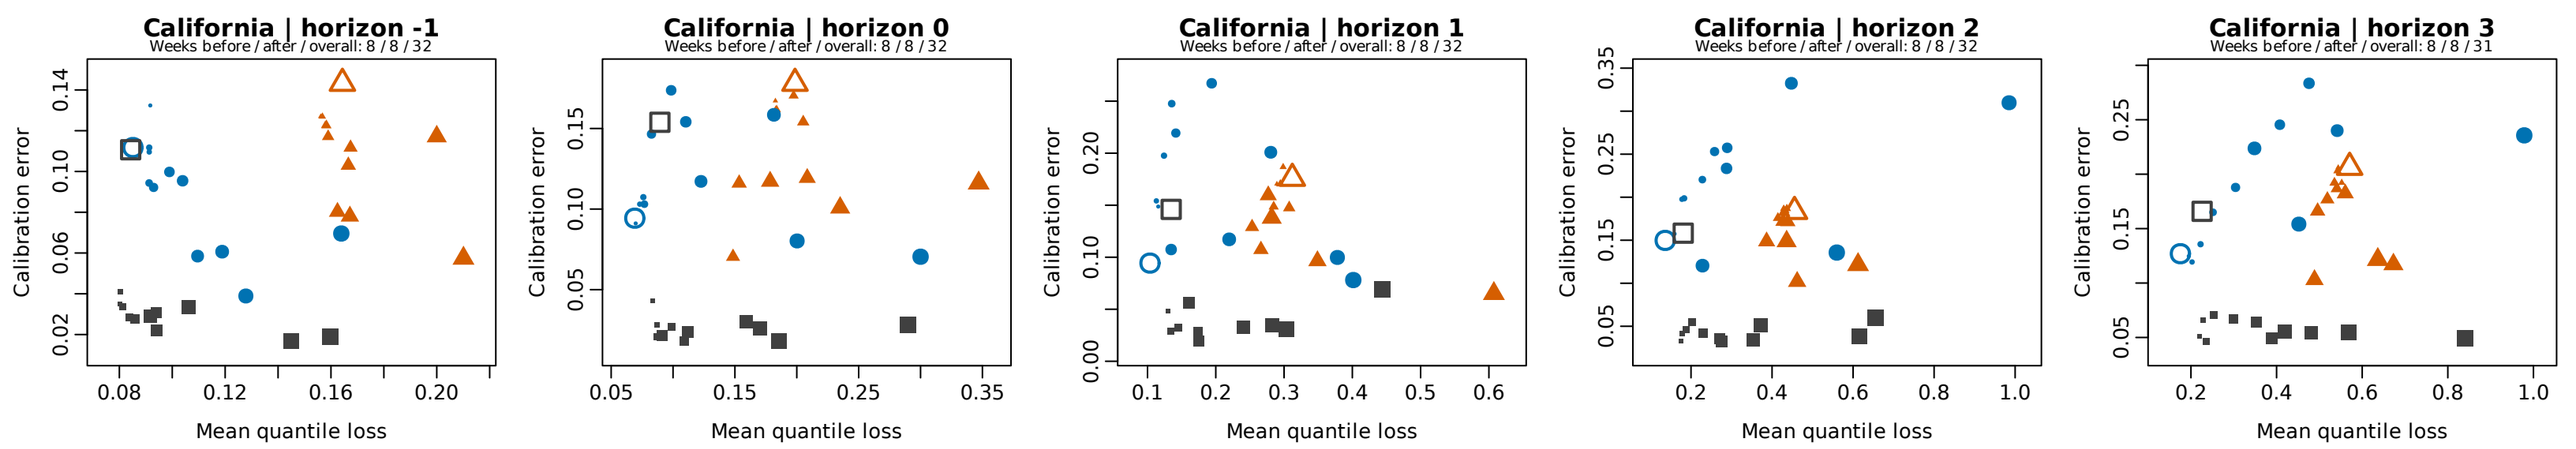

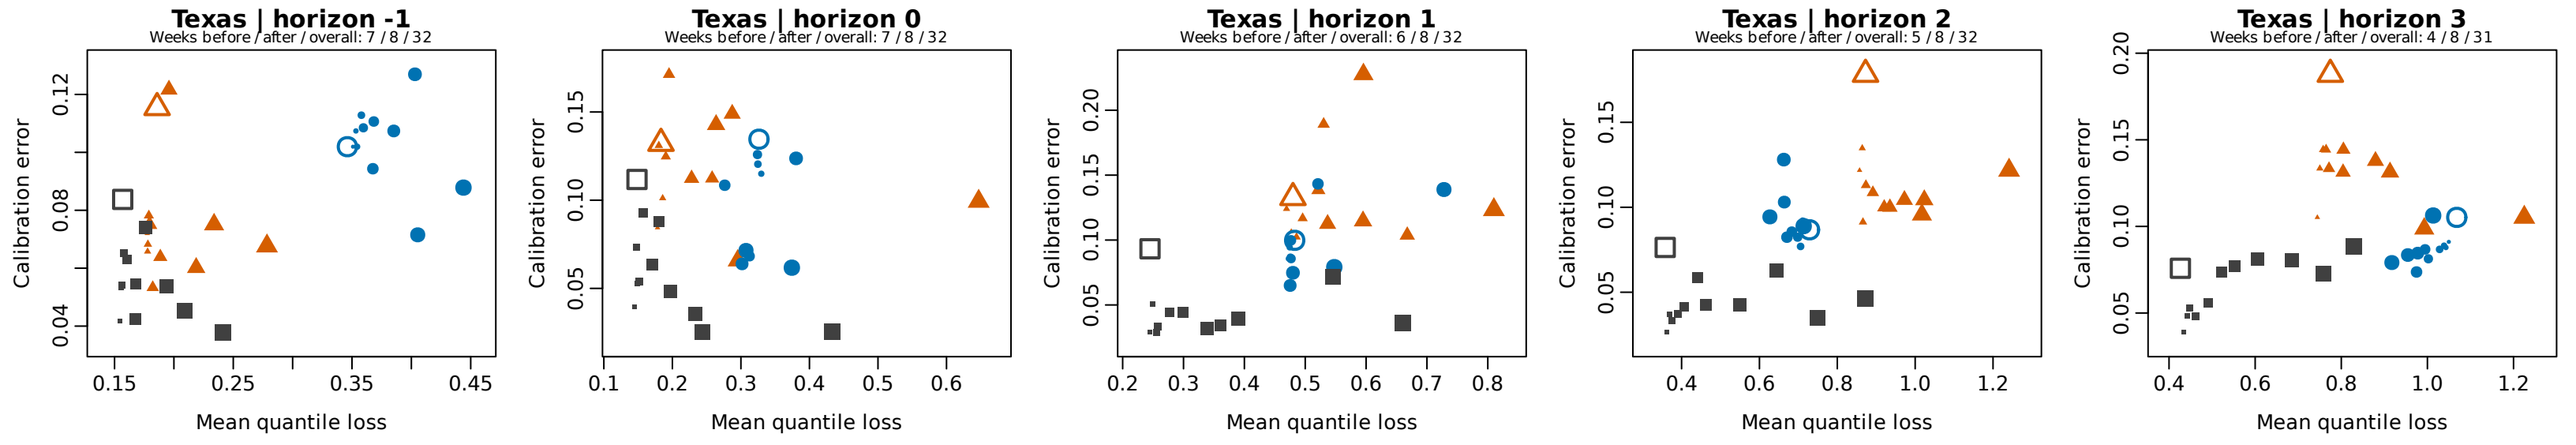

FLU | delay 1 | Fixed-rate MultiQT: calibration error vs mean quantile loss, mean over quantile levels

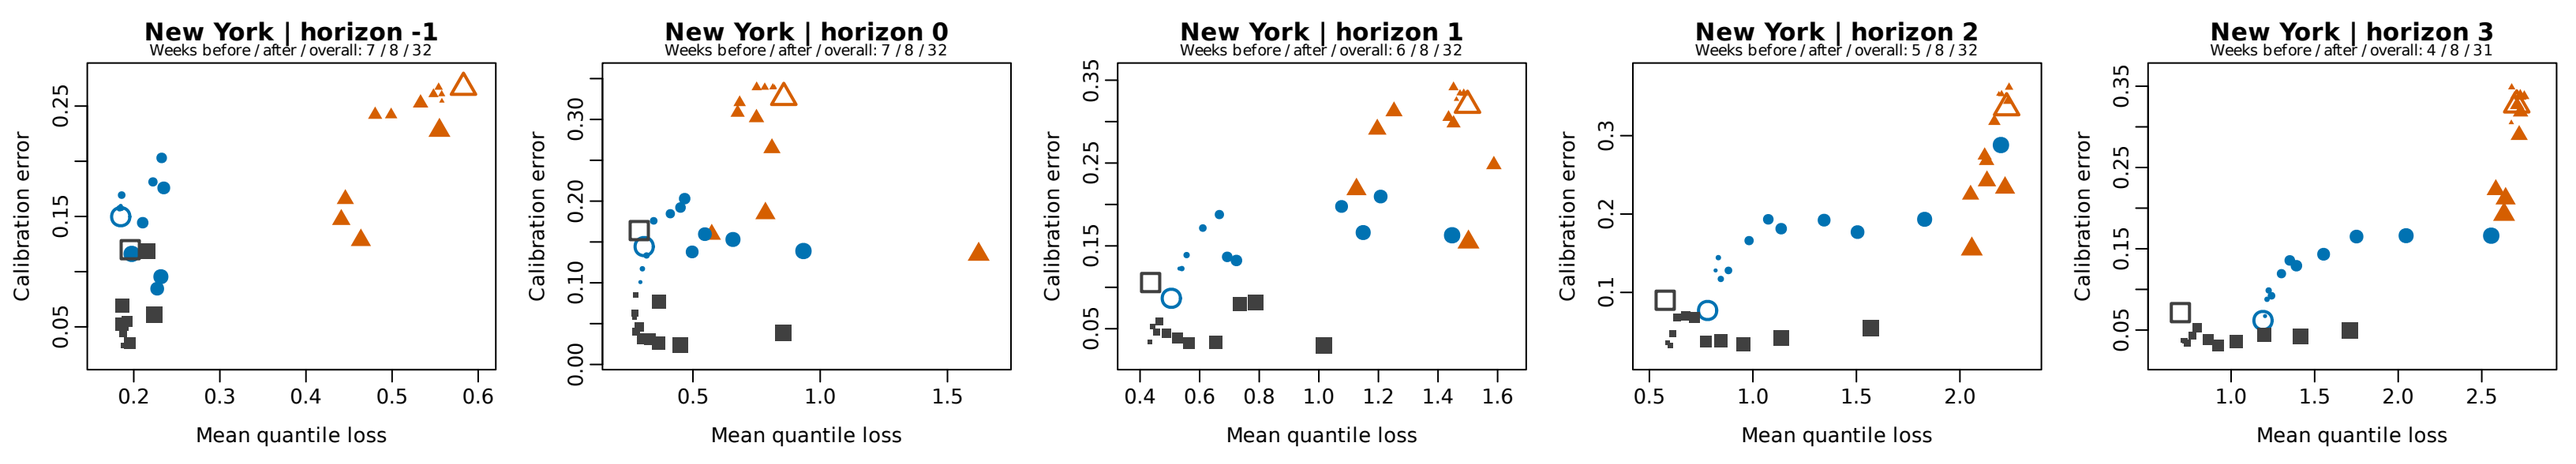

Count tracking | eta = m * S0, S0 frozen after 20 released rows (in hindsight: warmup replayed) | Feedback delay 1 | Scored against latest reported counts in counts per 100k residents | Lower left is better.

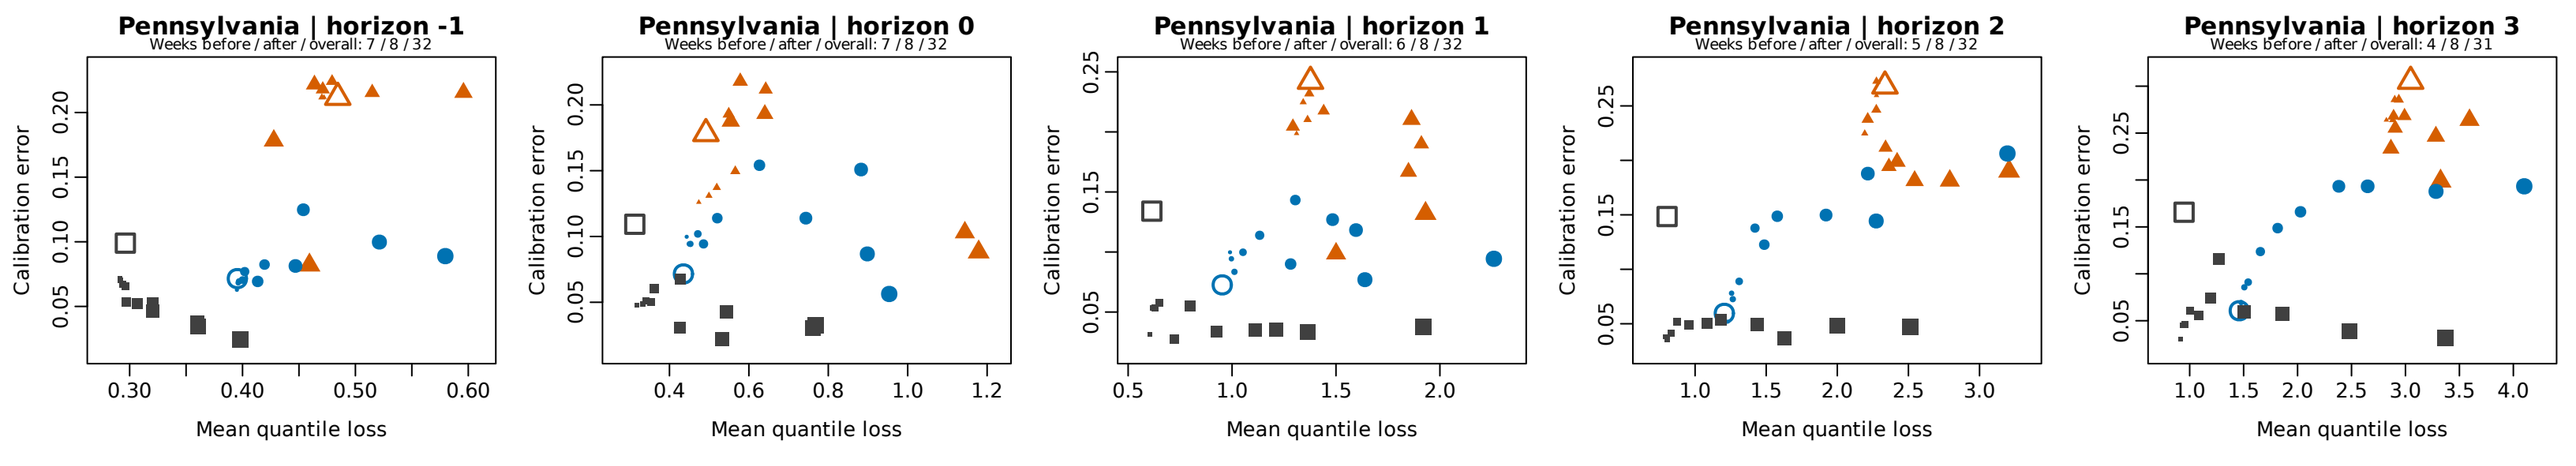

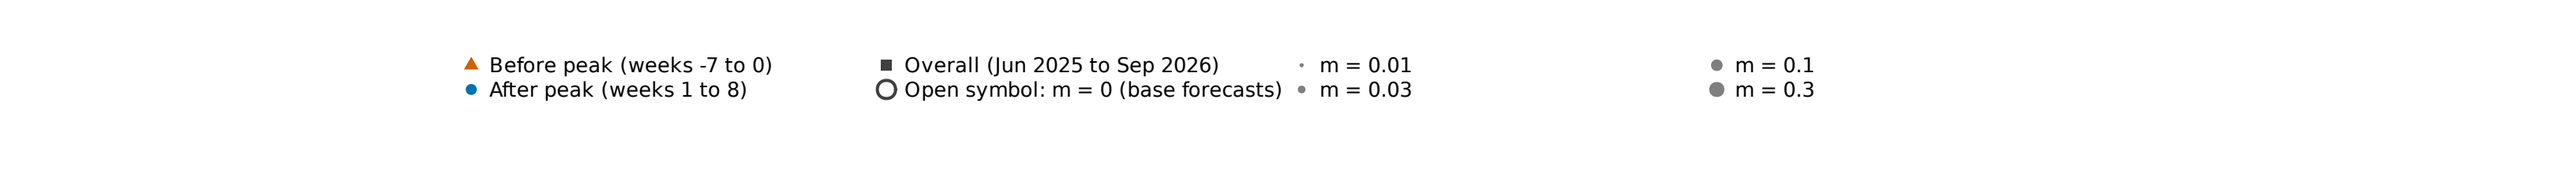

FLU | re-run | Fixed-rate MultiQT: calibration error vs mean quantile loss, mean over quantile levels

Count tracking | eta = m * S0, S0 frozen after 20 released rows (in hindsight: warmup replayed) | Feedback re-run | Scored against latest reported counts in counts per 100k residents | Lower left is better.
